CIVIL ENGINEERING COLLEGE, SIBPUR.

AGRICULTURAL DEPARTMENT.

HIGHER AGRICULTURAL CLASS.

SESSION 1903-1904.

RULES FOR ADMISSION.

FOR admission to the Higher Agricultural class, an applicant must have one of the following qualifications:—

(*i*) He must have passed the F.E. examination of the Calcutta University, and be under 23 years of age, but no student will be allowed to join the Agricultural class after the expiration of five years from admission into the Engineering College.

(*ii*) He must have passed the B.A. examination of the Calcutta University by the B course, or possess other sufficient educational qualifications, be under 23 years of age, and, in addition, have received a nomination from the Bengal Government

(*iii*) He must have had a general education qualifying him to follow the instruction in the Higher Agricultural class, and must also receive a nomination from Government for admission as a special student. To be eligible for a nomination under this rule, a candidate must either have landed property of his own, or be recommended by some influential landholder who desires to train him to take part in the management of his estate, or he must otherwise satisfy Government that he intends to make practical use of his agricultural training. Students entering under this rule will be termed Special Agricultural Students. They will not be subject to any maximum limit of age, but will not be entitled to the privileges conferred on passed students under rules 12 and 13, even though they should obtain fully-signed diplomas in due course after passing the necessary examinations.

Every candidate for admission to this Department must apply in writing to the Principal not later than the 14th July. The form of application for a nomination, which must be addressed to the Principal, is given in Appendix B. In the event of the form not being properly filled up and accompanied by the necessary certificates, no notice will be taken of the application.

The number to be nominated each year will depend on the accommodation available.

Every applicant, not already a student of the College, must undergo a medical examination by the College Surgeon before admission to this Department. If this officer's report is unsatisfactory, the applicant will not be admitted.

The session begins on the first Monday in November. All students are required to join the College on that day. Any student prevented by sickness from attending on the opening day must produce a certificate to that effect from a Civil or Assistant Surgeon, failing which he will be liable to a fine not exceeding Rs. 10. No student will be admitted or re-admitted to the College after the month of November, except by special orders of the Director of Public Instruction. This permission will only be given under exceptional circumstances.

COURSE OF INSTRUCTION.

The course of instruction in the Higher Agricultural Class will extend over two academic years.

SCHOLARSHIPS.

Senior scholarships awarded in the Engineer Department are tenable in the Agricultural Department.

One graduate scholarship of Rs. 30 a month, tenable for one year, will be awarded on the result of the examination held at the end of the first academic year.

APPOINTMENTS.

Two appointments annually are assigned to students holding a fully-signed diploma: one in the Provincial Executive Service and one in the Subordinate Executive Service. The right of selection for these appointments will rest with Government, and the students who gained the highest marks at the examination for diplomas will not necessarily be selected.

Other holders of fully-signed agricultural diplomas, who wish to compete at the examination for admission to the Provincial, Subordinate Executive, and Opium Services, may submit their names through the Principal to Government for nominations. These applications for nominations will be considered, provided the applicants appear to His Honour the Lieutenant-Governor to be otherwise suitable for admission to these services.

ENTRANCE AND TUITION FEES.

Each student in the Higher Agricultural Department will be required to pay an admission fee of Rs. 10.

F.E.'s who elect to join the Agricultural Department immediately after passing the F.E. examination are exempted from the payment of this fee, as their names are already borne on the College books.

For the present no tuition fees will be charged to students in the Agricultural Department, except in the case of those joining as special students under rule 3 (*iii*). The tuition fees for these students will be Rs. 8 a month.

Further particulars may be obtained free on application to the Principal.

BIHAR SCHOOL OF ENGINEERING.

Prospectus for Admission.

THIS School is under the management of the Principal of the Patna College, assisted by a Board of Visitors: it owes its origin to a fund raised by residents of Bihar to commemorate the visit to India of His Royal Highness the Prince of Wales. The object of the fund was the promotion of technical instruction in Bihar. The School was formally opened on the 11th July 1896 by His Honour the Lieutenant-Governor of Bengal.

2. The number of students admitted to the first-year class of each year will be limited to 60, of whom only 15 can be other than Biharis by race (viz., natives of the North-Western Provinces, Central Provinces, or Bengalis domiciled in Bihar); but should the number of suitable applicants who are Biharis by race be insufficient to fill up the 45 vacancies, then the vacancies thus occurring can be given to those applicants who are natives of the North-Western Provinces, Central Provinces, or Bengalis domiciled in Bihar in that order.

3. The School, as at present constituted, is chiefly engaged in training students for appointment as Sub-Overseers and Overseers.

The curriculum includes—

(1) A sound study of Elementary Mathematics.
(2) Careful training in Survey work.
(3) Drawing, both Freehand and Engineering.
(4) Elements of road-making and the construction of simple buildings.
(5) Workshop practice, with hand tools and with machinery.

Students are prepared for the Overseer certificate of the Public Works Department. The necessary additional buildings have now been completed; and Government has agreed to reserve one appointment annually for a qualified student from this school, who must be a Bihari by race.

4. The next Session will commence on 6th July 1903.

5. In the Overseer Department, which corresponds to the Apprentice Department of the Sibpur College, the monthly fee is Re. 1-8. All scholarship-holders, however, receive free tuition. Government scholarships of the value of Rs. 7 a month, tenable for one year, are awarded each year on the results of the annual examinations, *eight* being tenable in the second-year class, *six* in the third-year class, and *six* in the fourth-year class. Of the scholarships attached to the school, 75 per cent. of them are to be reserved for those students who are Biharis by race. The teaching is in English.

6. Candidates for admission to the Overseer Department must be under 20 years of age, must be Biharis by race or domicile, or natives of the North-Western Provinces or Central Provinces, and must have passed one of the tests mentioned below:—

(1) The Entrance Examination of an Indian University, in English and Mathematics.
(2) Standard VII of the Code of European Schools.
(3) Students who have not passed either of these tests, and who are otherwise eligible will have to pass an examination in English and Mathematics (of about the same standard as the Entrance Examination of the Calcutta University, in these subjects) to be held by the Principal of the Patna College on the 14th and 15th July respectively (from 6 A.M. to 9 A.M. each day).

7. Candidates for admission must apply to the Principal not later than the 30th June. Their application must give the following particulars:—

(*a*) Name, address, and occupation of father or guardian.
(*b*) Race and religion, and *evidence to show that he is either a Bihari or a native of the North-Western Provinces or Central Provinces or a domiciled Bengali.*
(*c*) A certificate of good moral character.
(*d*) An attested certificate of age (showing that he is under 20 years of age).
(*e*) A medical certificate showing him to be fit for employment in the public service.

It should be noted that transactions on account of Government are included in the statements in paras. 1 and 3 but excluded from all others in this report, being dealt with separately in paras. 18 and 56.

The aggregate sea-borne trade of Bengal has fallen in the past year by 3·3 per cent. in value. In the foreign trade the fall has been 2·8 per cent., and in the country trade 6·4 per cent. In the former there have been increases only in imports of *gold* and exports of *silver*. In the coasting trade fluctuations have been more varied, but the general result is a smaller trade in Indian produce, while foreign merchandise has contributed a larger total value. At the same time the movements of gold and silver have operated to reduce the aggregate value. Calcutta has absorbed 97·9 per cent. of the foreign trade, Chittagong 1·7 per cent., and the remaining ports ·4. In the coasting trade 87·6 per cent. of the aggregate value appertains to Calcutta, and 7·05 per cent. to Chittagong. Of the amalgamated foreign and coasting trade Calcutta is credited with 96·55 per cent., Chittagong 2·54 per cent., Balasore ·54 per cent., Cuttack ·18 per cent., Puri ·04 per cent., and Narayanganj ·15 per cent.

* In this and all other statements in this review showing rupees, the value is stated in lakhs only, followed by two places of decimals (which is equivalent to omitting "000").

The trade has again fallen, the decrease being 2·68 per cent. The foreign trade has been chiefly affected.

Fluctuations in treasure are separately shown in the statement and the result of a combination of bullion and specie movements both in the foreign and coasting trade is a net importation of 4·16 crores in comparison with 3·70 crores in the previous year. In the foreign trade the net imports were 4·89 crores against 3·52 crores in 1901-1902, owing to larger imports of *gold* and considerably smaller exports of the same metal. The result of treasure movements in the coasting trade is a net export of 73 lakhs, as compared with a net import of 18 lakhs in the previous year. Exports of *silver* were a great deal larger than in the previous year to meet the requirements of the very abundant rice crop in Burma, and there were also no imports of silver on behalf of the State. In merchandise in the foreign trade, exports exceeded imports in value by 16·29 crores, and the aggregate trade of both combined was less by 1·87 crores or 2 per cent. Details of these fluctuations are shown in the statements for imports and exports that follow. Imports of merchandise into Calcutta from foreign countries were greatest in value in April, September and March, and lowest during the months of May, June and February. Similarly, exports of Indian produce attained their highest values during the months of September, October and December, and their lowest in May, July and August.

4. Merchandise in the coasting trade rose by 4 lakhs in imports, and 9 lakhs in exports; the aggregate trade increasing by 1·1 per cent. In imports there were larger receipts of *cotton grey piece goods*, and *mineral oil*, but exports of *grain and pulse* fell off considerably. Exports rose through larger shipments of *jute manufactures*, *cotton goods*, *opium* and *spices*, but there was a heavy drop in the value of *coal*.

5. The following table gives the range of prices of the more representative articles, taking the year 1900-1901 as the basis of comparison:—

Under exports four have increased in value and ten have decreased, and the aggregate Index price has fallen in comparison with 1900-1901 by 8·2 per cent., and in comparison with the following year by 2·6 per cent. If the aggregate volume be taken at the average values ruling in the previous year, it will be found that the aggregate value for the past year's trade has fallen by 1·9 per cent: in imports by 1·4 per cent. and in exports by 2·1 per cent.

In imports there was a decline in groups I, II, III (C), V, VI and VII (A) and an advance in the remainder. Group I consisted almost entirely of *horses* from Australia. The decline in group II was, in *sugar, salt,* and *wheat.* The advance in III (A) was in *other sorts* of *hardware,* and in III (B) in *galvanised iron sheets, plates.* and *copper* both *unwrought and wrought. Machinery* for *jute mills* and *electrical* purposes are responsible for the falling off in III (C) while *locomotive engines and tenders* and *carriages and trucks* swelled the total in III (D). The fall in group V was in *kerosine oil;* and that in VII (A) in *cotton twist and yarn. Jewellery, tea chests, paper* and *glassware* advanced the total of VII (C). The remainder call for no special remarks.

7. There were advances in exports under groups III (B), III (C), V, VII (A), VII (B) and VII (C) and declines in the remainder. A smaller export of *tea* is responsible for the fall in group II, that in IV was in *opium*, and *indigo* and the fall in group VI is distributed between *seeds, raw jute, coal, raw cotton* and *hemp* while *shellac* absorbs the advance in VII (C). The remainder need no remarks.

Regarding the distribution of trade with the different countries, it should be noted that the figures throughout this report refer only to the port of destination or exportation as shown in shipping bills and bills of entry, and should not be taken to indicate the country of final destination or of production, as the case may be.

The most important items are dealt with separately in the course of this review. But a few of the remainder though unimportant in themselves, merit observation on account of the variations they have been subject to in the past year.

Thus in *jewellery* there has been an increase in value of 10·8 per cent. There was no advance from the large demand of the previous year for unset pearls and precious stones, but in set articles, gold ornaments, &c., there was a considerable business done. The Darbar festivities no doubt contributed to this. *Paper and pasteboard* have advanced in value by 8·3 per cent., and the large demand for printing paper has continued. A considerable increase in imports of gambier has caused the value of *dyeing materials* to rise by 14·2 per cent. The practical cessation of *grain* imports is due to the fact that no wheat was received from Australia in the past year; it has on the other hand been necessary to export wheat to those colonies.

The principal products have separate treatment later in this review, and a few only of the remainder are therefore remarked on here.

Provisions have risen in value by 7·6 per cent. in the past year, solely by reason of larger exports of ghi to Natal and Mauritius. There has been a large demand for animal bones as *manure* and the value has risen in consequence by 30·5 per cent. More went to the United Kingdom and Germany; and as much as 8 lakhs to Australasia, in particular to New Zealand. *Drugs* and *medicines* have been affected to the extent of 37·6 per cent. by a decrease in exports of "other sorts" of drugs to Hong-Kong. *Apparel* has risen by 36·7 per cent. as a result of a very large trade in boots and shoes with Natal and Cape Colony. Exports of *mica* have increased by 28·3 per cent., chiefly to the United Kingdom and Germany, and under *fodder, bran, etc.,* the increase in value of 25·9 per cent. is largely due to a greater demand for oil-cake and "other sorts" of fodder from the United Kingdom and the Straits Settlements.

Fluctuations in specific articles have already been dealt with: it remains only to discuss the fluctuations in trade with specific countries and groups of countries.

The value of the trade of Calcutta passing through the Suez Canal was 68⅓ crores against 69½ crores in 1901-1902 and the proportion of the total trade of the port using this route decreased from 75·6 to 74·8 per cent.

United Kingdom.—The proportion of the trade of Calcutta with the United Kingdom declined by 1·3 per cent. Imports into Calcutta increased by nearly 43½ lakhs but shipments decreased by 133 lakhs. In imports the increase was chiefly in *metals*, *railway plant and rolling stock*, *cotton goods*, *liquors*, *drugs and medicines*, *instruments and apparatus*, *provisions*, *apparel* and *chemicals*. On the other hand there were decreases in *machinery and mill-work*, *woollen goods*, *salt*, *oils* and *paints and colours*. In shipments the value declined in *tea*, *seeds* and *jute manufactures*, *dyeing materials* (chiefly *indigo*) and *raw jute*. There were advances, however, in *grain and pulse*, *lac*, *wool manufactures*, *saltpetre* and *raw silk*.

Continent of Europe.—The check received by the continental trade in 1901-1902 was accentuated in 1902-1903, the decrease being 64 lakhs or 3·8 per cent. Imports fell off by 119⅓ lakhs owing to the restrictions placed upon *sugar* from Germany and Austria-Hungary and to a decline in *kerosine oil* from Russia. The advance in exports was general to all countries, but most pronounced in *oilseeds* to Belgium and France, in *rice* to Russia and Holland, and in *hides and skins* to Germany and Austria-Hungary.

United States of America.—There was a net advance of 19 lakhs in the trade with this country. Imports declined by 13 lakhs due to a smaller trade in *drugs and medicines*, *metals* and *wood and manufactures of wood*, but exports showed an increase of 32 lakhs stimulated by a better demand for *jute manufactures* and *lac*.

Rest of America.—Imports almost vanished as no *timber* was received, but the value under exports expanded by 49 lakhs which is fully accounted for by *jute manufactures* and *tea*.

Mauritius, Cape Colony, and Natal.—The trade with these countries improved under imports by 37½ lakhs and under exports by 32¾ lakhs. With the former the increase was in

silver from Mauritius and *gold* from Natal; with the latter in *gunny-bags* and *rice* to Cape Colony.

Egypt.—Imports advanced by 4 lakhs, chiefly in *salt* and *sugar* whilst exports fell by 10¼ lakhs which is more than covered by a decline of 16 lakhs in *seeds* and of 2 lakhs in value of *indigo*. The trade in seeds is entirely for transhipment to other countries.

Rest of Africa.—The trade with the rest of Africa is unimportant.

Eastern Asia.—Imports improved by 57½ lakhs while exports declined by 64 lakhs. Larger receipts of *sugar* from China, Straits Settlements, and Java and of *copper* from Japan account for the advance, while contracted shipments of *opium* to China, Straits Settlements, and Java, *raw cotton* to China and Japan, together with a smaller trade in *cotton twist* to China explain the decline under exports.

Western Asia.—There was a net improvement in the trade. Imports declined by 5½ lakhs owing to reduced receipts of *salt*, but shipments increased by 2½ lakhs owing to a better demand for *rice* from Arabia and the Maldives. More *tea* was sent to Turkey and Persia, and more *jute manufactures* to Turkey.

Ceylon.—This trade receded by 38½ lakhs, of which 27¼ was in imports and 11¼ in exports. *Treasure* accounted for 20¾ lakhs of the decrease in imports and *cocoanut oil* and *shells* for the balance. The decline in exports was in *coal, grain and pulse.*

Australasia.—The total trade with Australasia showed an improvement of 46¼ lakhs, imports advancing by more than 101 lakhs which was more than covered by the larger receipts of *gold*. Exports fell off by 54¾ lakhs due to a smaller demand for *jute manufactures* and *tea*.

SHIPPING.

(FOREIGN TRADE.)

49. One thousand and ninety-two vessels of 2,788,909 tons entered and cleared during the year as against 1,065 of 2,611,863 tons in the year before. The number of vessels entering was 569 representing 1,451,470 tons and of vessels clearing 523 with a tonnage of 1,337,439 showing an increase of 170,598 and 6,448 tons, respectively. The number entering increased by 40 (all steamers) while clearances decreased by 13. Vessels entering and clearing in ballast increased from 185 to 237. Of the increase of 52, 41 were vessels entering. Of vessels of various nationalities visiting this port, those carrying the British flag rose from 919 to 968 and their tonnage from 2,246,397 to 2,477,419. Vessels flying the German colours fell from 79 to 77, but there was an increase in their tonnage, from 230,898 to 232,580. Vessels taking full cargoes of *coal* fell from 105 to 80. Vessels leaving with full cargoes of *jute* fell from 72 to 43.

The Government demand for transports came practically to a standstill with the withdrawal of troops from China.

50. *Freights.*—London rates ruled lower than in the two previous years, and business generally was dull, the year beginning and ending with the market at about the same tone. There was a slight improvement only in the months of August, owing to a number of steamers being chartered from Burma for Japan, September, and February, when a fair amount of business was put through. Country business and coal freights were dull.

The previous year closed with outward freights to India in a depressed condition which has been considerably aggravated in the year just closed. Rates were highest in July, August, and September, after which a continuous and steady decline set in.

CUSTOMS REVENUE.

(FOREIGN TRADE.)

51. Import duties have been subject to three changes during the year. The most important, although latest, of these was the reduction in salt duty from Rs. 2-8 to Rs. 2 per maund under Notification No. 1542S.R., of the 18th March 1903, Finance and Commerce. The immediate effect of the reduction was, that large clearances of salt, which had been held back in anticipation, were made at the lower rate of duty between the 18th March and the close of the year; 606,568 Indian maunds being cleared in this short period representing a reduction in revenue of Rs. 3,03,284. The next most important change was the imposition of additional duties by Act VIII of 1902 passed on the 6th June

on sugar benefited by the trade combinations known as Cartels. Rupees 1,51,139 were realised under the new Act, practically in the first three months of the year after which there was a marked decline in imports of beet sugar from Germany and Austria-Hungary, the countries chiefly affected by the new duties. As a consequence the income from countervailing duties levied under the previous Act (XIV of 1899) fell from Rs. 11,95,109 to Rs. 3,67,431; and ceased practically to exist during the last four months of the year. The last of the changes referred to was of small importance, being the levying of an import duty on kerosine oil tins (which are made of iron) in addition to the duty leviable on the oil itself.

The gross revenue collections from customs amounted to Rs. 4,18,30,441 showing an increase of ·9 per cent. This figure includes the revenue from *salt*, Rs. 2,42,73,129, and from general merchandise, Rs. 1,75,57,312; but the year's increase was due to the salt receipts, those from general merchandise having actually declined by 2·9 per cent. If the revenue from salt imported into Calcutta but paid into district treasuries for clearance from inland warehouses be added, which amounted in the past year to Rs. 30,12,585 (a decrease of ·3 per cent.), the gross revenue is further increased to Rs. 4,48,43,026, or an advance of ·8 per cent. The net revenue, that is, the sum remaining after deduction of refunds and drawbacks, was Rs. 4,43,30,131, giving an increase of ·8 per cent. upon the net revenue for 1901-1902.

A feature of the year's results is the uniformity with which the proportions of the previous year borne by each separate heading to the total are reproduced. With the exception of Schedule III in which the variation has been from 61·4 per cent. to 63·4 per cent. owing to an increase of revenue from salt duty, and of sugar in Schedule IV the countervailing duties for which have dropped from 2·9 per cent. to ·9 per cent., there has been no variation exceeding ·5 per cent. Schedule II (*arms and ammunition*) contributed revenue to the extent of Rs. 1,70,498, or ·4 of the total. Schedule III accounted for Rs. 2,65,05,679, or 63·4 per cent. *Salt* contributed 58 and *liquors* 5·4 per cent. of the total. Schedule IV absorbed Rs. 1,31,18,188, or 31·3 per cent. Under Schedule V the collections on exports of *paddy and rice* amounted to Rs. 15,17,506, or 3·6 per cent. of the whole. There was again an increase in the collections of excise duty on local *cotton manufactures* which rose from Rs. 5,863 to Rs. 6,605, an increase of 12·6 per cent. The amount repaid in refunds and drawbacks was greater by 7·9 per cent. than in the previous year, rising from Rs. 4,77,355 to Rs. 5,12,895. Import refunds amounted to Rs. 4,28,070 and export refunds to Rs. 56,004. The former were chiefly made up of salt, Rs. 1,26,116, which was 40·7 per cent. less than in the previous year: arms, Rs. 1,12,101, and of sugar, Rs. 1,39,008. These three items, salt, arms, and sugar aggregate 88·1 per cent. of the total import duties refunded.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 a.m. of that day.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; ∠, lightning; p, passing temporary showers.

Simla, the 2nd July 1903.

No. 2528.—The Governor-General in Council, with the previous sanction of His Majesty's Secretary of State for India, is pleased to direct that in the Notification of the Government of India in the Home Department, No. 1324, dated the 2nd May 1902, for the words "Order of Merit" the words "Indian Order of Merit," and for the rules published therewith the following rules shall be substituted:

Rules for admission to the Civil Division of the Indian Order of Merit.

1. The "Indian Order of Merit" (Civil Division) consists of three classes, and is conferred on Natives of India, whether servants of Government or not, as a reward for personal bravery shown in aid or support of the public authority or safety. The insignia

are, for the first class, gold; for the second, silver with a gold wreath; and for the third silver only; to be worn on the left breast, pendent from a dark-red ribbon with blue edges.

2. Admission to the third class is obtained by any conspicuous act of individual gallantry; admission to the second class can be obtained only by members of the third class, and for a similar act of gallantry; and, in like manner, the Order of the first class is conferred only on members of the second class. In recommending persons for admission to the Order, the act of gallantry must be particularly specified, and the statements of eye-witnesses to the deed must be attached. It is of the highest importance, in view to maintaining the value and prestige of the Order, that the greatest discretion shall be used in submitting recommendations; as it is very desirable that the distinction should only be granted for conduct which can clearly be defined as an act of conspicuous gallantry.

3. Admission to each class of the Order rests with the Government of India alone; and, when the act of gallantry has taken place in india, recommendations for the reward will be forwarded for submission to the Government of India, in the case of civilians through the District Officers to the Local Government, and in the case of native officers and soldiers through the usual military channels.

4. A record in each case of the particular act of gallantry for which the Order has been conferred is kept in the office of the Secretary to the Government of India in the Home Department; and a certificate signed by him, declaring the grant of the Order, will be given to each individual on his admission to, or advancement in, it.

5. District Officers are required to report immediately to the Local Government, for communication to the Government of India in the Home Department, any casualty by death amongst individuals admitted to the Order which may occur previous to the receipt of the decoration.

6. The following are the rules for the disposal of the insignia of the Civil Division of the "Indian Order of Merit" on the decease or promotion of members:

In cases of advancement to a superior class of the Civil Division of the "Indian Order of Merit," the inferior badge is to be forwarded, through the prescribed channel, to the Secretary to the Government of India in the Home Department, Calcutta. The insignia of the Order are, however, allowed to remain in the possession of the family of a deceased member.

7. Whenever a servant of the Government, being a member of the Order, is dismissed the service, and whenever any member of the Order is convicted of any such offence, or subjected by a Criminal Court to any such order, as implies, in the opinion of the Local Government, a defect of character which unfits him to be a member of the Order, a full report of the circumstances shall be transmitted to the Government of India in the Home Department, together with an expression of the Local Government's opinion; and it shall, thereupon, be open to the Government of India to direct the dismissal of any such member from the Order and to require the surrender of his decoration.

3. As a rule, the conferment of the Indian Order of Merit in the Civil Division will not be accompanied by any grant of money; but the Government of India reserve the right of making such a grant, in addition to conferring the Order, in special cases.

The 3rd July 1903.

No. 2562.—In exercise of the powers conferred by section 5 of the Indian Explosives Act, 1884 (IV of 1884), the Governor-General in Council is pleased to direct that for the words "nothing in these rules shall apply to the packing or transport" in the third paragraph of the Notification of the Government of India in the Home Department, No. 5528, dated the 11th October 1901, as amended by the like Notification No. 2759, dated the 11th September 1902, the words "nothing in these rules shall apply to the packing, transport or importation" shall be substituted.

RESOLUTION ON THE REPORT ON COLONIAL EMIGRATION FOR THE YEAR 1902.

GENERAL DEPARTMENT—EMIGRATION.

Darjeeling, the 30th June 1903.

RESOLUTION—No. 1631.

READ—

The Annual Report on Emigration from the Port of Calcutta to British and Foreign Colonies for the year 1902.

1. *Administrative measures.*—The following important administrative measures were sanctioned during the year under report:—

(1) A proposal made by the officer administering the Government of Fiji that an Emigration Agency for that Colony should be established in the Madras Presidency was approved by the Government of India subject to certain conditions.

(2) It was decided to allow female emigrants to Mauritius to be engaged on indenture, on certain terms, for service in that Colony.

(3) The recruitment of Indian labourers for the Natal mines was permitted subject to specified conditions.

2. *Requisition and despatch of labour.*—The number of Agencies recruiting emigrants was one more than last year, recruiting for Jamaica, which was suspended in 1901, having been resumed during the year under report. Natal requisitioned and received the largest number of labourers, the number of emigrants requisitioned having risen from 770 in 1901 to 2,770 in the year under report. This is particularly noticeable, because there was a general decrease, in the year under review, both in the total demand and supply of labour for the Colonies, the demand for Demerara, in particular, having decreased from 4,000 to 2,000 labourers. The greater number of emigrants (nearly 63 per cent. of the whole number) were, as usual, recruited in the United Provinces of Agra and Oudh. Recruiting operations were, for the first time, extended, during the year, to Ajmere, but only 63 emigrants were registered there.

3. *Depôts.*—Of the 13,898 emigrants who were received at the sub-depôts, 12,059 arrived in Calcutta; and, if emigrants who were recruited in the preceding year, persons readmitted from hospital after recovery, infants born during the year, and one orphan of a returned emigrant, be added to these, the total number accommodated in the depôts in Calcutta was 13,329, against 15,973 in 1901. The percentage of deaths in the depôts was slightly higher than in the preceding year, being ·65 against ·60. The percentage of rejections for unfitness, viz., 7·44, was smaller than in 1901, but the Lieutenant-Governor agrees with the Protector of Emigrants in thinking that the medical examination of emigrants at the sub-depôts is still capable of improvement: this matter will receive attention.

4. *Embarkation of Emigrants.*—During the year 10,882 emigrants, of whom 435 were returned emigrants, were embarked, against 11,951 in the year 1901, the largest number (2,907) being sent to Natal and the smallest number (786) to Mauritius.

5. *Returned Emigrants and remittances from Immigrants in the Colonies.*—(*a*) In all 4,236 emigrants returned to India from the Colonies, against 3,708 in the year 1901. Their aggregate savings amounted to Rs. 7,74,786-11-10, the average for each immigrant amounting to Rs. 182-14-5, against Rs. 165-10-2 in the preceding year. On the other hand, only 2,212, or 52·21 per cent. of the returned emigrants, brought back savings which ranged from one rupee upwards; while it is calculated that 893 adults, or 21·08 per cent. of the total number of returned emigrants, came back with no means at all.

(*b*) The resident immigrants in Natal (72,965 in number) again sent the largest remittances by money-order to India, the total amount so sent reaching nearly 16 lakhs. Since the year 1899, the average remittance from each resident immigrant in that Colony has risen from Rs. 5-15-3 to Rs. 21-12-2 in 1902, the last-named figure being ten times higher than the average remittance from Fiji and about thirty-five times higher than that from any other Colony. These figures, taken together with the high wages offered for labour in the mines, show that the prospects of the Indian immigrant are far brighter in Natal than in the other Colonies. The average remittances from Demerara and Mauritius were a little lower than last year, while those from the other Colonies show some improvement.

6. The thanks of the Lieutenant-Governor are due to Dr. Forsyth for his careful administration of the Department.

By order of the Lieutenant-Governor of Bengal,

A. EARLE,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE SANITARY COMMISSIONER, BENGAL, FOR THE YEAR 1902, AND THE ANNUAL STATISTICAL RETURNS AND SHORT NOTES ON VACCINATION IN BENGAL FOR THE YEAR 1902-1903.

The Report of the Sanitary Commissioner, Bengal, for the year 1902.

The Annual Statistical Returns and short Notes on Vaccination in Bengal for the year 1902-1903.

THE mortality in 1902 was greater than that in any year of the preceding decade except 1900. The first four months, from January to April, showed a considerable improvement over the two previous years, but in June the death-rate was abnormal, and in September it was much the highest on record. The seasonal variations exhibited by cholera in Bihar as usual presented a marked contrast to those observed in Bengal, and more especially in Eastern Bengal. In Bihar the mortality from cholera is usually greatest in the hot months, whereas in Bengal the cold weather is the fatal period. In the case of fever the heaviest mortality occurs at the close of the rains or the beginning of the cold weather, but there is a recrudescence, which is very marked in Bihar, about March or April. Such mutations would be more easily traced if the Divisional totals were inserted in those tables in which figures for each separate district are given. Small-pox, which claims the next largest number of victims after fever and cholera, pursued its customary course, gathering strength during the cold weather and then dying off gradually till the close of the rains. In those districts, however, where the people live in detached homesteads its incidence was slight, and, as has usually been the case in such localitities, no seasonal variations were discernible.

2. The vital statistics from 1894 onwards have been compiled on a uniform plan, and the figures for the different years may be accepted as sufficiently reliable for purposes of comparison *inter se*. These nine years, from 1894 to 1902, may be appropriately divided into three triennial periods. In the first of these, from 1894 to 1896, the average mortality was 2,379,795; in the second period, which, it may be noted, included the famine year 1897, it sunk to 2,149,448; and in the three years ending 1902 it rose to 2,467,529.

3. The average number of reported deaths in the third triennial period exceeded that in the first by 87,734, and a remarkable circumstance is that of the total increase 78,875 related to infants less than one year old. The detailed figures show, however, that there was a sudden increase in infant mortality in 1899, and that it has remained at a higher level since then; and it is probable that the difference is due either to a change in the system of reporting or to a change in the method of classification. Mr. Gait in the Census Report writes of a tendency to ignore the deaths of infants under one year of age because they are buried without any ceremony, and their decease is thus not likely to attract much notice; and it is possible that such cases are now reported more frequently than they formerly were. Apart from any question of increase, however, the Lieutenant-Governor considers that the rate of infant mortality is so high as to deserve close examination. In this connection the attention of the Sanitary Commissioner has been drawn to the appalling rate of infant mortality in Calcutta, and to the fact that in 62 per cent. of the town areas shown in the Provincial Appendix to his Report the total deaths exceeded the births; and he has been requested to enquire how far the latter result is due to the high death-rate among infants. At the same time it may be pointed out that the statistics of towns can go but a very small way to explain the increase

in the whole Province, as the number of additional deaths of infants under one year old reported in 1902, as compared with that reported in 1894, is very nearly equal to the total mortality from all causes in all the town areas put together.

4. Deaths from fever formed 69 per cent. of the whole number reported, which was a smaller proportion than in any of the previous eight years, with the exception of the year 1900. A comparison of the three triennial periods shows that from 1894 to 1896 the mortality averaged 1,731,437; from 1897 to 1899 it fell to 1,568,631; and from 1900 to 1902 it rose again to 1,680,915. It is satisfactory to observe that in the Province as a whole the mortality did not rise to its former level. A further analysis of the figures discloses that in Eastern Bengal (*i.e.*, in the Dacca and Chittagong Divisions) the mortality rose during the second period, and remained practically at the same level during the third; that in the Burdwan, Presidency, Rajshahi, and Orissa Divisions it fell, and then rose to a higher level than before; that in Bihar (*i.e.*, in the Patna and Bhagalpur Divisions) it fell in the first and rose again in the third period, but the later level was much below the first; and that in Chota Nagpur the mortality in each period was lower than that in the preceding. The actual average annual mortality in the three triennial periods was:—In Eastern Bengal, 289,686, 338,174, and 339,122; in the Burdwan, Presidency, Rajshahi, and Orissa Divisions taken together, 681,451, 618,515, and 710,660; in Bihar, 658,773, 526,107, and 546,852; and in Chota Nagpur 101,527, 85,838, and 84,280.

5. While, however, the mortality from fever in the whole Province has diminished, the disease has, according to the statistics, increased in severity in certain districts. During the last four years a district death-rate from fever exceeding 35 per mille has been reported on fourteen occasions as compared with eight in the preceding five years, while in the more recent quadrennial period it has thrice exceeded 40 per mille, a rate which was never before reached. It is not improbable that this increase may be explained by the improvement in reporting which has been brought about by the introduction of the dafadari system, and the better supervision thereby attained over the conduct of chaukidars. Still, whether the previous returns were correct or not, it is obvious that nothing should be left undone to ascertain, and if possible to combat, the causes of the enormous mortality now reported. The Sanitary Commissioner considers that any exhaustive investigation by Civil Surgeons is impossible, and the Inspector-General of Civil Hospitals recommends that an enquiry should be conducted by a specially qualified officer in one of the fever-stricken districts, which would, he believes, clear up many of the difficulties which now surround the subject. Enquiries of this kind have often been held before and in some cases with useful results, but the knowledge of tropical diseases has developed so rapidly within the last few years that an investigation conducted now would, in the Lieutenant Governor's opinion, be much more likely to prove efficient than could have been expected even five years ago. His Honour has accordingly accepted this recommendation, and has directed that such an enquiry should be undertaken as soon as the services of a suitable officer can be spared.

6. The total number of attacks from plague during the year was 38,928 against 90,762 in 1901, and of deaths 32,967 against 78,629. The ratio of deaths to attacks for the whole Province fell from 86·6 to 84·6, which probably indicates a slight improvement in reporting attacks rather than a decline in the virulence of the epidemic. This ratio is still, however, in excess of what is considered to be the normal ratio of plague mortality, as well as of the average ratio for the whole of India, which between the year of the first outbreak of the disease in Bombay (1896) and the end of March 1902 is roughly estimated to have been 77·3 per cent.

7. The preventive measures adopted in the case of plague remained unchanged. Disinfection was systematically carried out in Calcutta and in several mufassal towns, but it was generally viewed with suspicion in rural areas, where evacuation of infected houses, which was for the most part resorted to spontaneously, was the only measure in favour. Towards the close of the year the system of desiccation by dry heat, which was introduced with success by Dr. Sahwney in Jammu in Kashmir, was tried in several places; but the experience gained in the short period of its working

has not been sufficient to justify any definite pronouncement as to its utility. Inoculation, which from the first has been a purely voluntary measure, was resorted to in the few districts in which there was a demand for it, but though, so far as ascertained results show, the immunity which it conferred was unmistakable, the demand was very small and was confined to three districts only.

8. The death-rate from small-pox in 1902 (·77 per mille) was much higher than that recorded in any other year during the decade, and this fact is no doubt largely responsible for the increase in the number of vaccine operations which is noticed in the Sanitary Commissioner's notes on vaccination for the year 1902-1903. Singhbhum and Midnapore were the districts worst affected, the epidemic having apparently survived in both cases from the previous year, in which the mortality from small-pox was also unusually high. The consequent increase in the number of operations during these two years is noticeable as indicative both of energetic measures of repression on the part of the authorities, and of a growing belief in the efficacy of vaccination on the part of the populace. The invariably high death-rate in the three districts of the Orissa Division, particularly in Cuttack and Puri, has on several occasions attracted the notice of the Lieutenant-Governor, who has been led to conclude that it is to an appreciable extent due to their contiguity to Native States, in many of which the resort to vaccination, even where it has taken root, is only of comparatively recent growth. Recent enquiries, moreover, have shown that the old prejudice in favour of inoculation survives with more vigour in this Division, and in the adjoining Political States, than elsewhere in Bengal, and His Honour has already taken steps to enlist the assistance of the executive authorities, both in British and in Independent Territory, in the suppression of the practice. The rapid advance made in 1902-1903 in the spread of vaccination in the Political States of Chota Nagpur is peculiarly gratifying, and the Lieutenant-Governor sees in it the fruits of a measure recently undertaken with the full co-operation of the Chiefs under which a system of trained supervision was introduced, the cost being contributed in proportion to their areas and population by the various States concerned, with the object of checking and improving the work of the vaccinators. The introduction of a similar system in the Orissa States is under discussion, and the useful object-lesson afforded by Chota Nagpur should help to convince the Orissa Chiefs of its utility.

9. The general results of the year in regard to vaccination are distinctly satisfactory from a departmental point of view, and they bear out the conclusion to which the Lieutenant-Governor has independently arrived in favour of the continuance of the licensed, as opposed to the paid, system of vaccination. There was a decided increase in the proportion of persons successfully vaccinated, the total ratio being 34·22 per mille against 32·68 in 1901-1902, and the average number of operations performed by each licensed vaccinator rose from 914 to 990, while the average cost to Provincial and Local Funds of each successful case remained unchanged. The Lieutenant-Governor would, however, be glad if the Sanitary Commissioner could arrange to adduce some more direct evidence than is at present furnished of the efficacy of vaccination in warding off the disease or mitigating its severity. It might be possible to arrange that whenever a death from small-pox is reported, information should at the same time be obtained from the chaukidar or other reporting agency, whether the death is that of a vaccinated or of an unvaccinated person. If this could be done, a real criterion of the success of vaccination would be available, which might serve to convince the general public of the value of this means of prevention; and moreover the continual enquiry whether the deceased had been vaccinated would direct their attention to the subject and lead them to note the evidence themselves.

10. The Sanitary Boards had under consideration during the year a number of schemes for the improvement of the water-supply, the drainage and the conservancy of various localities, but the work actually carried out was not of importance. A system of cleansing villages and rural towns was, however, inaugurated by the Patna Sadar Local Board in the previous year, and was carried on during the year under review. The procedure is for members of the Board to report the names of villages in the vicinity of their places of

abode which they find to be in an insanitary state; an annual programme is prepared; estimates are drawn up; and cleansing operations are carried out under the supervision of the members of the Board. The operations consist of the cleansing of the village sites, the conservancy of the village, the removal of filth and rank vegetation, the filling up of ditches, and the like. The experiment is an exceedingly interesting one, and the Lieutenant-Governor hopes that it may have a future before it.

11. The Sanitary Board also continued the enquiry into the septic system for the disposal of sewage. In circular No. 18T.—M., dated the 25th November 1900, Government advised caution in the adoption of this system pending the outcome of certain bacteriological experiments which were being made. These experiments were completed during the year under review, and though their results showed that the effluent from a septic tank was not free from pathogenic organisms, nor of sufficient purity to be discharged with safety into any possible source of water used for drinking purposes, the conclusions were sufficiently favourable to justify the conviction that the septic method, if introduced with proper precautions, was a considerable improvement on the old systems of disposal of night-soil by trenching, and it is clear that it obviates to a large extent the nuisance caused by the passage of conservancy carts through the streets of a town. After weighing all the evidence, the Lieutenant-Governor considered that the system had passed beyond the experimental stage, and sanction was accordingly given to the Muzaffarpur Municipality to construct a septic tank. As this is the first municipal venture of the kind, its results will be carefully watched, and the experience attained should prove a valuable guide to other municipalities in Bengal.

12. The Lieutenant-Governor has examined with satisfaction the unmistakable evidence contained in Statement I appended to the Sanitary Commissioner's Report that marked improvement has in certain cases followed the introduction of water-supply and drainage schemes. In one or two instances, however, apart from plague, the reported results are less satisfactory than might have been anticipated, and the Lieutenant-Governor would be glad if in his next report the Sanitary Commissioner would give his own opinion regarding such cases.

One hundred and six applicants obtained permission to compete, and 105 actually appeared and answered the examination papers; 14 of these were Muhammadans; 8 were Biharis (including 5 Muhammadans), and 3 were Uriyas. The total number of candidates who obtained one-third marks and above was 84.

These six probationary officers will each receive a subsistence allowance of Rs. 50 per mensem; and if the reports from the districts in which they are stationed are favourable, they will, after a period of probation for six months, be appointed to the eighth grade of Deputy Magistrates and Deputy Collectors as vacancies occur. They will not be vested with magisterial powers until they are so appointed. Separate orders will be passed posting these officers to districts.

5. The following are the three candidates selected by the Lieutenant-Governor to be Probationary Sub-Deputy Collectors:—

FIRST FORECAST OF THE JUTE CROP IN BENGAL FOR THE SEASON 1903.

The following is published for general information.

A. Earle,
Offg. Secy. to the Govt. of Bengal.

The 2nd July 1903.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First forecast of the Jute Crop in Bengal for the Season 1903.

Explanatory.—Returns are received from 26 districts in Bengal, the area under jute in the remaining 21 districts being insignificant. About two-thirds of the crop is grown in Eastern Bengal, principally in Mymensingh, Tippera, Dacca, Pabna, Rajshahi and Bogra, while one-fourth comes from the Rangpur, Dinajpur and Jalpaiguri districts of Northern Bengal. The present forecast contains figures for the area sown and the probable outturn of the crop, as estimated up to the middle of June.

2. *Character of the season.*—The weekly weather and crop reports from the important jute-growing districts show marked deficiency of rain in April and, to some extent, in May. The following figures are given :—

		March.	April	May.	From 16th May to 17th June	Remarks.

	Actual ...	1·13	1·33	8·23	15·26	

The Collectors report deficiency of rain at the time of sowing from all the jute-growing districts except Murshidabad and Balasore, whose areas under jute are comparatively unimportant. On this account Purnea, Nadia, Dinajpur and Tippera report that the season will be late and in the Province generally the area under the crop will be smaller than

3. *Area cultivated.*—It is now estimated by District Officers that the normal area under jute is 2,326,000 acres, but probably this is still an under-estimate. Not less than 2,350,000 acres may be taken as the normal area and 70½ lakhs of bales as the normal outturn. Last year District Officers reported 2,106,300 acres under the crop with an outturn of 76 per cent. These figures were raised by the Director to 2,200,000 acres with an outturn of 80 per cent, producing nearly 53 lakhs of bales. The figures recently received for export and consumption lead me to believe that the outturn of the crop of 1902 was not less than 58 lakhs of bales.

In the present season Collectors report the area under jute as 2,019,100 acres. The following districts are reported mainly responsible for the deficiency. Mymensingh a deficiency of 62,000 acres, Rangpur 43,000 acres, Dinajpur 40,000 acres, Tippera 26,000 acres, Bogra 24,000 acres, Rajshahi 23,000 acres, Nadia 19,000 acres, Khulna 12,500 acres, Jessore 12,000 acres, Malda 10,000 acres, 24-Parganas and Purnea 6,000 acres each, and Pabna, Jalpaiguri and Faridpur 5,000 acres each. It is undoubtedly the fact that a smaller area has been sown this year than last year owing to want of rain at the time of sowing, but, having regard to the marked tendency to under-estimate, it is safe to assume that the area under jute this year is not less than 2,100,000 acres.

4. *Character of the crop.*—Notwithstanding the smaller area, the estimates for outturn given by District Officers are on the whole more favourable than last year. The important districts of Mymensingh and Tippera each estimate 90 per cent., Rangpur 82 per cent., Pabna 75 per cent. Dacca and Jalpaiguri estimate 70 per cent. each, while Rajshahi reports 60 per cent. and Dinajpur 50 per cent. only.

The detailed estimates of the District Officers for the Province work out to only a fraction under 80 per cent., but the returns for some districts appear to be unduly low. Making allowance for the tendency to under-estimate, I anticipate that an 85 per cent. crop *in the area sown* will be reaped, provided that conditions for the remainder of the season are normal. A telegram from Tippera of 20th reports an improvement after the recent heavy rain, and a telegram from Mymensingh of 22nd reports only slight damage. As the area sown is less by 10 per cent. than the normal area, an outturn of 85 per cent. in that area represents 76½ per cent. of a normal outturn, or nearly 54 lakhs of bales.

5. *Stocks of the previous seasons' crop in hand.*—All District Officers report stocks to be very low.

The above estimates of area and outturn are based upon the reports from District Officers, which are published for general information with this forecast.

REPORT UNDER SECTION 41 OF BENGAL ACT I OF 1893 ON THE WAREHOUSES IN HOWRAH FOR THE YEAR ENDING 31ST MARCH 1903.

No. 1550T.—M.

The 4th July 1903.—The following report is published for general information.

L. P. SHIRRES,

Offg. Secy. to the Govt. of Bengal.

Dated Howrah, the 14th May 1903.

From—H. LEMESURIER, Esq., Chairman of the Howrah Municipality,
To—The Magistrate of Howrah.

I HAVE the honour to report that 270 warehouses were licensed in 1902-1903. out of 305 registered during that year against 254 out of 297 registered in 1901-1902; the details being as follows:—

YEARS.	Jute.	Cotton.	Straw.	Wood.	Hay.	TOTAL.
Registered 1901-1902	32	30	57	176	2	297
Registered 1902-1903	34	34	55	180	2	305
Licensed 1901-1902	28	27	42	155	2	254
Licensed 1902-1903	29	33	44	163	1	270

2. The income from license fees during the year under report amounted to Rs. 7,941, of which Rs. 183 were arrears for 1901-1902 and Rs. 1,297 on account of license fees for the next year collected in advance, against Rs. 5,869 (of which Rs. 79 were on account of arrears for 1900-1901) in 1901-1902. There is thus a decided improvement in collection of license fees in the year under report.

3. The demand, collection, remission and balance for 1902-1903 are shown in Appendix A, and the details of licenses granted in this year to Jute and Cotton Warehouses are entered in Appendix B. Owing to the comparative unimportance of the 208 licenses granted for the storage of straw, wood, and hay in 1902-1903, against 199 in the previous year, they have not been entered in Appendix B, and it may be noted that such license fees have only been levied under the Fire-brigade Act since July 1893, prior to which they were levied under section 261 of the Bengal Municipal Act.

4. There were 40 prosecutions in the year under review, which realized in fines Rs 161 against 23 in the previous year which produced Rs. 136.

5. The expenditure incurred in assessing and collecting license fees amounted to Rs. 878 as detailed below:—

	Rs.
Salary of General Supervisor and Assessor ...	600
Salary of Inspector	180
Salary of Clerk	42
Salary of Peon	48
Contingencies	8
Total ...	878

6. The bill on account of the commission payable to the Inspector amounting to Rs. 72 was not received till after the 31st March 1903. The Fire-brigade establishment continued under the control of the Commissioner of Police, Calcutta. The Fire-brigade Station in Howrah stands in a very central position, north of the Municipal Market, and from a wooden stage raised over it the whole town is overlooked. There were seven fires during the year, the details of which are given in Appendix C. There were also seven other petty fires, at three of which the Fire-brigade attended while four were extinguished by residents of the localities.

7. The Commissioner of Police demanded Rs. 4,581 for the maintenance of the Fire brigade in 1902-1903, and this amount was remitted to him during the year.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 a.m. of that day.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ∠, lightning; K, thunderstorm.

No. 1390T.F.—The 6th July 1903.—The following revised rules* framed under sections 9, 105, and 130 of the Sea Customs Act, VIII of 1878, for regulating the weighment and removal by rail or water under bond of non-duty-paid salt from shipboard or from the Government Salt Golahs to a warehouse appointed or licensed under the Sea Customs Act, or under Act VIII of 1896 (the Inland Bonded Warehouses Act), and for the clearance of the salt from the warehouse, having been approved by the Lieutenant-Governor, are published for general information as required by section 204 :—

APPLICATION FOR GRANT AND WITHDRAWAL OF A LICENSE FOR AN INLAND BONDED WAREHOUSE.

1. An application for a license to open an inland bonded warehouse shall be in writing in the form (I) annexed, and shall be signed by the applicant. It should be presented to the Collector of the district within which the warehouse is to be situated.

2. Upon receipt of such an application, the Collector will cause enquiry to be made on the following points :—

(*a*) The suitability of the locality proposed for the warehouse.

NOTE.—A warehouse should be easy of access for purposes of inspection and for the carriage to it of salt without undue wastage during transit.

(*b*) The suitability of the ground site proposed.

NOTE.—A warehouse should be constructed upon a high and dry plot of land. in proximity to ready means of communication, *e.g.*, a railway, river, or khal. It should be at least 200 yards from any other golah in use for the storage of duty-paid or non-duty-paid salt.

(*c*) The suitability of the building erected for the storage of salt or the willingness of the applicant to construct such a building as a condition precedent to the grant of a license.

NOTE.—The following instructions indicate the conditions which will ordinarily satisfy the requirements of the Government in regard to the kind of warehouse to be licensed. They are not, however, to be understood as binding the bonders to any particular plan of building, or to the use of any particular material in its construction :—

(*i*) The warehouse need not necessarily be a masonry building, but may be one with double mat walls, a mud floor, and a tiled, thatched, or corrugated-iron roof. The ground, if damp, should have a single layer of bricks to keep the salt from contact with the earth.

(*ii*) The warehouse should be sufficiently raised above flood-level to be dry, and the plinth should be protected by *pucka* masonry walls. The compartments, if any are necessary, may be made of single or double mats with posts.

(*iii*) The height of the walls and size of the warehouse may be determined by the bonders. In practice a height of 12 feet will be found to be the most convenient.

(*iv*) No windows are necessary, if sufficient light is admitted through the door and under the eaves. When windows are provided, it is advisable to have them as near the roof as possible, so as to facilitate the storage of salt. They should be provided with iron bars, and should be capable of being closed from the inside. One good-sized door for the ingress and egress of coolies carrying loads is preferable to two, as it can be the more easily watched.

(*v*) Both doors and windows should be capable of being securely fastened. If there is more than one door, only one should be open at a time, and a second door should be open only if the darogah can conveniently see both doors at once. More than two doors should never be allowed to remain open at one time.

(*vi*) The warehouse should not be connected by any door or passage with any other godown, shop, or dwelling-house.

(*d*) The character, solvency, and general suitability of the applicant.

3. Upon completion of his enquiries the Collector will submit his report, together with the application in original, through the Commissioner of the Division, to the Board of Revenue.

4. Licenses, if granted, will be issued in the form (II) annexed.

5. Under section 16, Act VIII of 1878, a license may be cancelled on conviction of any offence under that Act relating to warehouses, or on the expiration of one month's notice in writing given to the licensee by the Board of Revenue on any grounds. No compensation shall be payable to the licensee in respect of such withdrawal.

6. (*a*) Applications for the renewal of licenses should be made to the Collector at least six weeks before the expiry of the term of the license.

(*b*) Upon receipt of such an application the Collector shall cause enquiry to be made into the condition of the warehouse and into the character and solvency of the bonder, and shall submit his report to the Board of Revenue through the Commissioner of the Division.

7. On receipt of an application under section 91, Act VIII of 1878, for the admission of salt into a warehouse appointed or licensed under the Sea Customs Act, or under the Inland Bonded Warehouses Act, VIII of 1896, and after the due execution of a bond under the provisions of section 92 of the Sea Customs Act, the Collector of Customs shall make such arrangements as he may deem necessary for the proper weighment of salt during its

* These rules do not relate to the reception and clearance of salt at Customs Ports, for which separate rules have been prescribed.

discharge from the vessel or from the golahs for the purpose of being conveyed to the warehouse. When the salt is to be rewarehoused, it shall ordinarily be permitted to be rewarehoused under the original bond in cases where no injury is likely to occur to the revenue, but the Collector may require a fresh bond in addition to the bond under section 92.

8. The weighment of salt on shipboard shall be carried on in the presence of the Preventive Officer, subject to such charges as may be in force and under such subsidiary arrangements as may from time to time be made by the Collector of Customs in respect of salt intended to be bonded in the Government golahs. When the salt has to be conveyed to a vessel which is not alongside the discharging vessel, a fee of one rupee per 100 maunds up to 500 maunds and two rupees for each 500 maunds, or part of 500 maunds, thereafter, will be payable.

CONVEYANCE OF SALT BY RAIL DIRECT FROM SHIPBOARD OR FROM THE GOLAHS.

9. Delivery may be made in bulk from the golahs or from shipboard. The salt may be discharged direct from the ship or the golahs into the wagons, and the amount of the salt so discharged may be ascertained by passing each wagon over the railway weigh-bridge in the presence of a Preventive Officer, or it may be weighed at the discretion of the Collector of Customs. When the salt is being delivered to any one other than the owner, delivery by weigh-bridge weight shall only be allowed when both parties give their consent in writing to this method of weighment.

10. A pass in the annexed Form No. III will be granted by the Preventive Officer to the railway official appointed to take charge of the loaded wagons or at the Kidderpore Docks to the Dock Superintendent as a protective document to be given to the railway guard when the train is finally made up. The name of the importing vessel and of the bonder, the quantity of salt loaded into each wagon, and the warehouse wherein it is to be deposited shall be endorsed on the pass. Salt covered by one bond may be despatched in part consignments, and the Preventive Officer shall grant a pass for each part consignment despatched. On the completion of the quantity covered by the bond, a note shall be made on the pass by the Preventive Officer that final delivery has been given.

11. After the salt has been loaded in the wagons, the wagons shall be closed and sealed by, or in the presence of, the Preventive Officer.

12. Immediately after the arrival of the wagons at their destination, notice shall be given by the bonder or his agent to the officer authorised by the Collector of the district or the Collector of Customs, if there be any, to supervise the transit of the salt to the warehouse. This officer shall thereupon note the date and hour of arrival, bringing any unreasonable delay to the notice of the Collector, examine the seals, and if they are found intact, take over from the railway guard the pass accompanying the salt endorsed by the Preventive Officer, and superintend the removal of the salt to the appointed warehouse, where it shall be stored in bulk without reweighment, unless the bonder or his agent shall desire reweighment. The expense of such reweighment shall be borne by the bonder.

CONVEYANCE OF SALT FROM SHIPBOARD IN THE STREAM, OR FROM THE KIDDERPORE DOCKS, OR FROM THE GOLAHS, PARTLY BY BOAT AND PARTLY BY RAIL, OR PARTLY BY BOAT AND PARTLY BY STEAMER.

13. (a) No salt intended to be conveyed partly by boat and partly by rail, or partly by boat and partly by steamer, shall be taken from shipboard or from the golahs, save in bags and in a lighter provided with hatches, which are capable of being securely fastened down, and it shall be the duty of the Preventive Officer to satisfy himself that such lighter is in a serviceable condition before permitting such salt to be placed therein.

(b) When salt has to be conveyed to a vessel lying within the limits of the Port of Calcutta, which is not alongside the discharging vessel or the Government golahs, it shall be conveyed in decked boats, the hatches of which shall be sealed, and in the case of bulk salt, the salt shall be stamped all over with the Government 'adul.' Each boat shall carry a Government peon accompanied by a representative of the bonders, and a boat-note in the form prescribed shall be handed to each manjhi. A Preventive Officer shall be stationed on board the exporting vessel, and his duty will be to see that the seals and stamps are intact, and that the salt in the boat has not been tampered with. He will securely seal the hatches of the vessels when loading is completed, and will endorse on the boat-note the quantity taken from the boats and placed on board. The boat-note or special pass will be made over to the master of the vessel, and a counterfoil of the note will be forwarded to the Collector of the district to which the salt is consigned. A fee of Re. 1 per 100 maunds up to 500 maunds, and Rs. 2 for each 500 maunds, or part of 500 maunds, thereafter, will be payable.

14. As soon as the bonder or his agent or servant shall notify to the Preventive Officer that he desires to proceed with any boat-load of salt, he shall obtain a boat-note in which the name of the importing vessel and of the bonder, the quantity of salt contained therein, and the warehouse wherein it is to be deposited shall be specified. The mouths of the bags shall be securely fastened, and the tying sealed with a stamp specially provided for this purpose, and the hatches shall be closed and sealed by, or in the presence of, the Preventive Officer. The lighter shall then be allowed to proceed in charge of a peon or other Custom House officer deputed for the purpose by the Custom House authorities, accompanied by an agent on the part of the bonder.

15. The boat shall be made fast to the bank nearest to the place where the railway wagons by which the salt is to be conveyed to the warehouse may be in waiting, otherwise at the moorings nearest to such ghat. It shall on no account (except stress of weather) be permitted by the peon or other Custom House officer on board to anchor anywhere else.

16. Notice of the arrival of such salt shall at once be given by the Custom House officer to the Preventive Officer deputed by the Customs authorities to superintend the storage of the salt in the railway wagons, who shall thereupon note the date and hour of arrival, bringing any unreasonable delay to the notice of the Collector of Customs, examine and compare the boat-note delivered by the Preventive Officer to the bonder, his servant or agent, and the cargo of salt, and superintend its removal to, and storage in, the wagons.

17. The bonder's agent and peon or other Custom House officer shall remain on board of the boat in charge until the seals and hatches are examined and all the cargo landed and put in wagons. After the salt has been put in the railway wagons, the wagons shall be closed and sealed by, or in the presence of, the Preventive Officer, who shall endorse on the boat-note the quantity landed from the boat and placed in the wagons. The boat-note shall be made over to the railway official appointed to take charge of the loaded wagons, and shall be made over by the railway authorities to the railway guard to be taken with the salt as a protective document.

18. Immediately after the arrival of the wagons at their destination, notice shall be given by the bonder or his agent to the officer authorised by the Collector of the district or the Collector of Customs, if there be any, to supervise the transit of the salt to the warehouse. This officer shall thereupon note the date and hour of arrival, bringing any unreasonable delay to the notice of the Collector, examine the seals, and, if they are found intact, take over from the railway guard the pass accompanying the salt, endorsed by the Preventive Officer, and superintend the removal of the salt to the appointed warehouse, where it shall be stored in bulk without reweighment, unless the bonder or his agent shall desire reweighment. The expense of such reweighment shall be borne by the bonder.

CONVEYANCE OF SALT IN BULK DIRECT BY WATER FROM SHIPBOARD IN THE STREAM, OR FROM THE KIDDERPORE DOCKS, OR FROM THE GOLAHS.

19. All applications under Rule 7 shall specify the name, tonnage, and manjhi or master's name of the vessel in which the goods are intended to be conveyed.

20. Salt shall be conveyed by vessels only so constructed that the hatches and all access to the hold in which the salt is loaded can be closed by seals to the satisfaction of the Preventive Officer superintending the discharge of salt, and no other cargo than salt shall be carried in such hold. Salt covered by one bond only shall be carried in each vessel, and duty-paid and non-duty-paid salt shall not be carried in the same vessel. Each salt vessel shall carry a special pass in the annexed form, under the signature of the Collector of Customs or the Preventive Officer giving delivery, covering the consignment of salt shipped by it. This pass shall remain in custody of the master or manjhi, and shall be made over by him to the officer authorised by the Collector of the district or the Collector of Customs, if there be any, to supervise the transit of the salt from the vessel to the warehouse. A copy of the pass shall be sent to the Collector of the district or to the Collector of Customs, if there be any.

21. The salt when placed on board each vessel must be stamped all over, the hatches and all access to the hold containing the salt being closed by seals during transit. Both the seals on the hatches and the stamps on the salt should be stated in the pass referred to in Rule 20.

22. When the discharge of salt from shipboard or from the warehouse is interrupted or not completed, such quantity as has been actually delivered at the time of interruption shall be covered by a customs boat-note. The salt so delivered must also be completely stamped over, and the hatches and all access to the hold must be sealed by customs seals to be examined by the night Customs Inspector, who must record his report of each such inspection.

23. The vessel on arrival at its destination shall be anchored as close as possible to the ghat leading to the warehouse in which the salt is to be stored, or at the nearest moorings to such ghat.

24. Immediately after the arrival of the vessel at its destination, notice shall be given by the bonder or his agent to the officer authorised by the Collector of the district or the Collector of Customs, if there be any, to supervise the transit of the salt to the warehouse. This officer shall thereupon note the date and hour of arrival, bringing any unreasonable delay to the notice of the Collector, examine the seals, and, if they are found intact, take over the pass delivered by the Preventive Officer to the master or manjhi of the vessel, and superintend the removal of the salt to the appointed warehouse, where it shall be stored in bulk without reweighment, unless the bonder or his agent shall desire reweighment. The expense of such reweighment shall be borne by the bonder.

GENERAL RULES.

25. Night work will be allowed at Chandbali (and Orissa generally) only on condition that special permits are first obtained from the Collector of Customs, Calcutta, who may at his discretion refuse to grant such permission.

26. The bonder will be held responsible for any departure from these rules on the part of his agent.

27. All expenses connected with the removal and storage of the salt and the services of the officer or peon in charge of the salt under Rules 8, 13 (*b*), or 14 shall be borne by the bonder.

28. If the officer referred to in Rule 12, 18, and 24 shall have reason to believe that the salt has in any way been tampered with during its transit, he shall at once report the circumstance to the Collector of the district or the Collector of Customs, if there be any, who shall direct the salt to be reweighed, and such reweighment shall be made in the first place at the expense of Government. If there be found any unexplained deficiency in the salt in the railway wagons or vessel as compared with the quantity specified in the pass or boat-note, the Collector may call on the bonder to refund the expense of weighment, and shall exact the full duty under Rule 36.

29. It shall be open to an inspecting officer to direct the reweighment in his presence of any consignment whether on arrival or in store, and such check-weighments should from time to time be made as opportunity offers. The expense of such a weighment will be borne by Government, and the result should be noted in the memorandum of inspection.

30. The salt shall be stored under proper supervision in the warehouse. The door of the warehouse shall have two locks; the key of one lock (which must be a Chubb's lock) shall remain with the darogah or other officer deputed by the Collector, and the key of the other with the bonder's agent.

31. Salt relating to different bonds shall be stored separately and distinctly. Any admixture of salt specified in different bonds shall render those bonds liable to cancelment and the holders to immediate payment of the full duty payable thereon The darogah or other officer deputed by the Collector shall keep a separate account in Form No. IV for the salt warehoused under each bond.

32. No duty-paid salt shall be stored in the same warehouse as non-duty-paid salt. An infringement of this rule will render the license liable to cancellation.

33. The owner of the salt shall be required to pay full duty on any difference between the quantity of salt originally delivered from shipboard or the golahs and the quantity cleared out from the warehouse, less an allowance of 3 per cent. on the whole if such wastage actually occurs.

34. In any special case the Chief Customs Authority shall be competent to direct that an increased allowance for wastage shall be granted in accordance with the provision of section 122, Act VIII of 1878.

35. When the seals are found intact, the owner or his agent may, within twenty-four hours from the time of arrival of the salt at its destination, pay the duty on the whole quantity of salt, less 1 per cent. for wastage in any consignment as shown in the pass or boat-note, after which the Collector of the district or Collector of Customs, if there be any, shall allow him to break bulk without weighing or warehousing being required. If the duty be paid under Rule 38 to the Collector of Customs, Calcutta, the darogah of the warehouse shall telegraph to the Collector of Customs, Calcutta, at the expense of the bonder, the condition in which the salt arrives and on receipt of an intimation of the payment from that officer, shall allow the bonder or his agent to break bulk, the other conditions being duly fulfilled.

A Sunday or gazetted holiday intervening between the arrival of the salt and the tender of duty should be excluded in reckoning the twenty-four hours mentioned above.

36. If the Collector of the district or the Collector of Customs, as the case may be, has any reason to believe that any fraud has been perpetrated by the bonder or owner of the salt or any person in his employ, he shall refuse to make any allowance on account of wastage, and shall demand the full duty payable on the entire quantity received into bond.

37. Before permission can be granted to transport salt to the warehouse, the bonder will be required to enter into an engagement with the Collector of the district or the Collector of Customs, if there be any, to defray the cost to Government of the establishment and charges noted in the margin, or such other establishment and charges as may be agreed to by the bonders with the sanction of the Board, which will be appointed by the Collector for the guard and supervision of the warehouse. The leave and pensionary charges of this establishment will be borne by Government. In the event of the bonder deciding to close the warehouse, he shall give to the Collector of the district or the Collector of Customs, as the case may be, a preliminary notice of not less than three months of such intention in order that the establishment entertained may be similarly notified of the impending termination of their employment. If such a notice is not given, the bonder shall be liable to pay to Government a sum in lieu thereof, equal to the pay of the establishment for the full period of three months, or for such time as the notice given falls short of three months, and this liability shall be accepted in the engagement to be entered into by him. If no notice be given to the establishment preliminary to their discharge, the sum so due shall be paid to them in lieu thereof when they are discharged. The bonders shall also bear all charges estimated by the Collector to be necessary for the proper preliminary equipment of the warehouse. All darogahs appointed to the charge of inland bonded warehouses shall be liable to transfer from one warehouse to another at the discretion, and under the orders, of the Board of Revenue.

RULES FOR THE CLEARANCE OF SALT.

38. Before any quantity of salt is cleared from the warehouse, duty shall be paid either at the district treasury or at the Calcutta Custom House, and the necessary protective document, if any be required, issued. At places where there is no Government treasury, and which are outside the salt limits, the Chief Customs Authority may, however, at its discretion, allow the duty to be paid through the post-office or to the Collector of Customs, Calcutta, who will send the receipt therefor direct to the darogah in charge of the warehouse.

39. All deliveries of salt bonded in the warehouse under the provisions of Act VIII of 1878 shall be supervised, as required by section 99 of the above Act, by the darogah, who shall give a security of Rs. 500. In the case of warehouses situated within the salt limits, he shall allow delivery to be taken on the production of the necessary protective document. In other cases he may deliver on the producton of the treasury chalan or the post-office receipt for the money-order.

40. Before any quantity of salt is cleared from a warehouse, the bonder shall be required to provide at his own expense scales and weights suitable for the weighment of salt, which, when first supplied, shall be tested and certified as correct by the Collector of the district or the Collector of Customs, if there be any, before they are brought into use. They shall be subsequently tested at the time of the inspection of the warehouse as often as may be convenient. The bonder shall also be required to maintain the same in proper order and to repair them at his own expense as may be necessary from time to time. Bonders are required also to make their own arrangements for cutting and removing the salt as well as to supply their own tools, such as *saboois*, *kodalies*, &c., for the purpose.

41. The duty of the darogah will be to keep in a book in Form No. V, provided for the purpose at the expense of Government, a correct tally of the weight of the salt taken off the scale by the bonder's people. He will be held personally liable for any excess or deficiency that may be discovered. Both the darogah and the bonder's agent will be required to certify at the end of each day's weighments the correctness of the tally book for that day's work.

42. The darogah shall get a fee of Rs. 2 for work on Sunday or a gazetted holiday, but shall be allowed no overtime fees, nor have any fixed hours of work during the day. The Chief Customs Authority may, however, at its discretion, fix the working hours of the darogah, and grant him overtime fees if at any time it is found necessary to do so. All these fees shall be recovered from the bonders.

43. Should any dispute arise between the darogah and the bonder or purchaser of the salt under delivery, the former will stop the weighment and at once refer the matter in dispute to the Collector of the district or the Collector of Customs, if there be any.

44. The darogah will be particularly careful to bring every irregularity that he may become cognizant of to the notice of the Collector of the district or the Collector of Customs, if there be any, without delay, and will be held responsible for failure in doing so.

45. When discrepancies in the accounts cannot be reconciled, and whenever there is reason to believe that the quantity of salt conveyed to the boat or cart is not correctly represented in the accounts, the Collector of the district or the Collector of Customs, if there be any, shall order a reweighment. The expense of such reweighment shall be borne by Government.

46. Whenever the bonder or purchaser is desirous of removing his boats or carts from the premises, the darogah shall satisfy himself on every point before removal, and shall also see, even where the accounts agree, that the boat-load or cart-load represents the exact quantity entered in the rowanna or covered by the chalan or money-order receipt.

47. The Chief Customs Authority may, in any exceptional case, specially empower any officer other than the Collector of the district or the local Collector of Customs to perform the duties prescribed in the foregoing rules in respect, of any warehouse.

48. These rules shall come into force from the date of the publication of this notification.

The following notifications are hereby cancelled:—

Class I.—To include all vessels of the usual native types of build.

A.—The product of half the length of the vessel from stem to stern, measured along the water-line, multiplied by the interior greatest breadth of the vessel, multiplied by the depth from the water-line to the bottom of the vessel, is to be taken as equal to the number of maunds upon which toll shall be levied.

6. This ticket may be demanded and checked by any navigation officer while the vessel is within the limits of the bhil channel, and must be kept on board and at hand for that purpose.

7. All tolls are payable on demand and shall be paid at the toll station before a vessel is permitted to proceed. Provided that the Collector of Tolls appointed under section VIII of the Act may at his discretion permit vessels belonging to individuals or firms of recognized standing to proceed without pre-payment, on an undertaking that the bills for tollage due shall be liquidated monthly on presentation.

ACCOUNTS AND FINANCE.

PUBLIC DEBT.

Simla, the 7th July 1903.

THREE-AND-A-HALF PER CENT. LOAN.

No. 3868-A.—His Excellency the Right Honourable the Governor General in Council has resolved to borrow two hundred lakhs of rupees for the public service in the following manner:

2. Promissory Notes will be issued for the said amount in the Form annexed to this Notification, being the form of the notes of *the Three-and-a-half Per Cent. Loan of 1900-01,* of which loan the notes to be now issued will form a part. All the conditions which apply to notes of *the Three-and-a-half Per Cent. Loan of 1900-01,* will apply to the notes to be now issued. The interest on the notes of that loan is payable half-yearly on the 30th day of June and the 31st day of December; and the notes are not liable to discharge before the 31st day of December 1920.

Tenders.

3. Tenders for the whole or any part of the said amount of Rs. 2,00,00,000 will be received by the Comptroller General from this date to noon of Wednesday, the 22nd July next. Tenders must be for sums of 100 Rupees or multiples of that sum.

4. Each tender must be addressed, in the form annexed to this Notification, to the Comptroller General, Calcutta, and enclosed in a closed cover, superscribed "*Tender for the Three-and-a-half Per Cent. Loan.*" If the tenderer is not resident in India, he must name an agent resident in India to whom an allotment-certificate may be issued, if any part of the loan is allotted to such tenderer.

NOTE (1).—Tenders made in accordance with these instructions will also be received by the Accountants General at Madras, Bombay, Allahabad, and Lahore, on account of the Comptroller General, Calcutta, on the 21st July, and up to the local time corresponding to 12 o'clock in Calcutta on the 22nd July; provided that—

(*a*) they are delivered personally or by clerk or messenger at the Accountant General's Office (where a receipt will be given for them);
(*b*) they are made on printed forms, to be obtained at the same office or at the local Presidency Bank;
(*c*) each tender is for not less than Rs. 10,000;
(*d*) the deposit is either a promissory note or a Treasury Receipt from the local Office of the Presidency Bank, or a cheque on a local Bank in favour of the Accountant General;
(*e*) the amount of the tender is made payable either at the place of tender or in Calcutta;

and the Accountant General will return deposits on non-accepted tenders and will issue allotment-certificates so far as the tenders are payable in Madras, Bombay, Allahabad, or Lahore.

NOTE (2).—Tenders made in accordance with these instructions will also be received at all Head and Sub-Post Offices up to a date to be notified at each Post Office. The date will vary according to the distance of the Post Office from Calcutta and will in no case be later than the forenoon of the 20th July. The following conditions must be complied with:

(*a*) the tenders must be delivered personally or by messenger at the Post Office, where a receipt will be given for them;
(*b*) they must be made on printed forms, to be obtained at the Post Office;
(*c*) each tender must be for not less than Rs. 100 and not more than Rs. 2,000;
(*d*) the deposit must be a receipt for the amount (which may not exceed Rs. 40 for each tender) from the Post Master of the Post Office at which the tender is made;
(*e*) the amount of the tender must be made payable either at the Head Post Office of tender (whether the tender was made at the Head Post Office or at one of its Sub-Offices) or in Calcutta. In the case, however, of a tender made at a Post Office in Calcutta, the amount of the tender must be made payable only at the Bank of Bengal.

The tenders will be transmitted by post by the Post Master to the Comptroller General so as to reach him before 11 A.M. on Wednesday, the 22nd July. The Comptroller General will deal with them as if they had been made direct to him, returning deposits on non-accepted tenders through the Post Master.

5. The rate at which each tender is made must be specified in rupees or rupees and annas: a tender in which no rate is thus specified, but a subscription is offered in some other terms—as, for example, at the recorded minimum, or at some specified percentage in addition to the recorded minimum, or at the average of the accepted tenders—will be rejected as null and void.

6. The rate at which a tender is made must not contain a fraction of an anna: if a rate containing a fraction of an anna is inserted in any tender, such fraction will be struck out and the tender treated as if the rate did not contain such fraction of an anna.

Deposits.

7. Each tender must be accompanied by a deposit of not less than one-hundredth or, if the tender be for less than Five Lakhs of Rupees, then for not less than one-fiftieth part of the tender. The deposit must be in one of the following forms: (*a*) a receipt for the amount from the Head Office of the Bank of Bengal, or Madras, or Bombay, or one of their Branches, or from an officer in charge of some Public Treasury, or (*b*) a cheque drawn in favour of the Comptroller General on a Bank in Calcutta, Madras, Bombay, Allahabad, or Lahore, or (*c*) Government Promissory Notes [1] standing in the name of, or endorsed to, the tenderer or the person making the deposit. In the case of tenders made at Post Offices under note (2) to clause 4, the deposit must be a receipt for the amount from the Post Master of the Post Office at which the tender is made.

[1] *It is particularly requested that such Promissory Notes may NOT be endorsed to the Comptroller General.*

8. (*a*) Deposits, not being promissory notes, will, in the case of accepted tenders, be credited proportionately in part payment of the allotment-certificates issued in respect of the tender, and will bear interest for the purpose of clause 16 below from the date of the opening of tenders. When a tender is not accepted in full, the deposits, when they are not in the form of promissory notes, will be credited as far as possible proportionately in part payment of the allotment-certificates issued in respect of it. If any allotment-certificate is not fully taken up, the deposit credited in respect of it will be forfeited.

(*b*) Promissory notes deposited in respect of any accepted tender will be held until all the allotment-certificates issued in respect of the tender are paid up and will, if the allotment-certificates are not fully taken up, be appropriated by the Government and cancelled.

Opening of Tenders.

9. The Governor General in Council reserves the right to declare, on or before the 15th July, the minimum rate at which tenders will be accepted. If not so declared, the said minimum rate will be recorded under the signature of the Comptroller General, and, before the tenders are opened, placed upon the table in a sealed envelope, but will not be declared unless some tender is rejected only because it is below the recorded minimum.

10. Tenders will be opened publicly by the Comptroller General at the Treasury Buildings, Calcutta, at noon (Calcutta time), on Wednesday, the 22nd July next, and those received under the terms of note (1) to clause 4 will be similarly opened by the Accountants General at Madras, Bombay, Allahabad, and Lahore at the local time corresponding to noon Calcutta time, on the same day; but the contents of the tenders will not be disclosed otherwise than as provided in clause 12.

11. Tenders at rates not below the minimum rate will be accepted in the order of the rates tendered, beginning with the highest rate. The amount allotted at the lowest rate at which tenders are accepted will be divided amongst those who have tendered at this rate in proportion, as nearly as may be found convenient, to the amounts of their tenders; provided that no allotment will be issued if the amount distributable on any tender is less than Rs. 100: preference will however be given to small tenders, not exceeding Rs. 2,000, at the lowest accepted rate, such tenders receiving allotments in full as far as possible.

Allotment-Certificates.

12. To each tenderer (or to his agent) whose tender is accepted in whole or in part, such number of allotment-certificates as may be necessary to make up the aggregate amount allotted to him will be issued by the Comptroller General[1] as soon as possible after the 22nd July and an alphabetical list of the names of those to whom such allotment-certificates are issued will be posted for general information at the Head Offices of the Banks of Bengal, Madras, and Bombay, and at the Branch Offices of the Bank of Bengal at Allahabad and Lahore.

[1] For tenders received by the Accountant General at Madras, Bombay, Allahabad, or Lahore, and payable at those places, the Accountant General will issue the allotment-certificates

13. If the allotment made on any tender is less than Rs. 3,000, then the whole of the allotment-certificates [after credit of the deposit under clause 8 (a)] will be made payable upon the 3rd September.

Otherwise the whole amount of each allotment will be divided into three instalments as follows:

Instalment I.—As near as convenient to 35 per cent., but not exceeding 35 per cent., payable upon the 4th August:

Instalment II.—As near as convenient to 35 per cent., but not exceeding 35 per cent., payable upon the 3rd September:

Instalment III.—The balance payable upon the 23rd September:

and allotment-certificates will be issued for each instalment separately.

But the whole or any part of any accepted tender may be paid at any time after receipt of the allotment-certificates.

The words "as near as convenient" refer to the necessity for making each instalment an exact multiple of Rs. 100.

14. Any allotment-certificates will, on application to the Comptroller General, be exchanged for an equivalent amount of allotment-certificates of smaller denominations; provided that if any payment (beyond the deposit) is recorded upon the cancelled certificate, it can be taken against, and recorded upon, only one of the certificates issued in exchange.

15. Payment of any allotment-certificate may be made to the account of the Government in the Head Office of the Bank of Bengal, or Madras, or Bombay, or in any Branch of these Banks, or into any Public Treasury or Treasuries in India which may be named in the tender in respect of which it was issued. Receipts for such payments will be given by the Banks of Bengal, Madras, and Bombay, or their Branches, or by the officers in charge of the Government Treasuries at which payment is made, by enfacement upon the relative certificate. In the case of accepted tenders which were made at Post Offices other than Post Offices in Calcutta under note (*2*) to clause 4, payment of allotment-certificates may also be made at the Head Post Office of tender, and the Head Post Master will give a receipt for such payment by enfacement upon the relative allotment-certificate.

Issue of Promissory Notes.

16. (*a*) When any allotment-certificate is fully paid up, the holder will, on presenting it duly receipted at the place where it was paid, obtain from the Public Debt Office, Calcutta, promissory notes of such values as he may desire (each note being in even hundreds and not less than Rs. 100) bearing interest from 31st December 1903, and he will also receive interest at 3½ per cent. per annum from the dates on which he may have made payment till the 30th December 1903.

(*b*) Or he may, at his option, by paying interest at the said rate from 30th June 1903 to the dates on which he may have made payment, obtain promissory notes as above, bearing interest from 30th June 1903.

RESOLUTION—By the Government of India, Finance and Commerce Department.

By the Notification in the Finance and Commerce Department, No. 3184A., dated the 1st June 1903, the rules under the Local Authorities Loan Act, 1879, for the raising of loans by local authorities in the open market have been amended so as to admit of any particular loan being defined in sterling currency with the previous sanction of the Governor General in Council.

2. His Excellency in Council gives notice that applications from local bodies for permission to issue sterling loans will be entertained only in cases in which there is a reasonable prospect of the money being raised at a rate of interest not exceeding 4 per cent., and at a price not appreciably below par. Applications should be made in sufficient time to admit of a reference to the Secretary of State before sanction is given to the issue of a sterling loan. Local bodies borrowing in sterling will have to make their own arrangements for bringing the capital raised to India and for remitting the interest to the holders of the stock. Such remittances will not be made by Government agency nor be brought on to the Government account.

3. The conditions set forth above will be applicable, not only to loans raised under the Local Authorities Loan Act, 1879, but also, as far as may be, to sterling loans which may be raised under special enactments by such local authorities as those specified in the margin.

PART IV.

Bills of the Bengal Council.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

THE following Report of the Select Committee on the Chota Nagpur Tenancy (Amendment) Bill, 1903, together with the Bill as amended by the Committee, is, by order of the President, published for information:—

WE, the undersigned, Members of the Select Committee to which the Chota Nagpur Tenancy (Amendment) Bill, 1903, was referred, have considered the Bill and the papers noted in the margin,* and have now the honour to submit this, our Report, with the Bill, as amended by us, annexed hereto.

* Letter from R. R. Pope, Esq., I.C.S., Judicial Commissioner of Chota Nagpur, No. 732, dated the 12th May, 1903. [Paper No. 2.]
Letter from the Honorary Secretary to the British Indian Association, No. 298, dated the 28th May, 1903 [Paper No. 3.]
Letter from the Secretary to the Board of Revenue, No. 67A.T., dated the 20th June, 1903, with enclosures. [Papers No. 4.]
Letter from the Honorary Secretary to the Indian Association, dated the 4th July, 1903. [Paper No. 5.]

2. The principal amendments are explained in the following paragraphs.

3. *Clause 1 (3)*.—This clause is new. It is based on section 2 (3) of the Code of Criminal Procedure, 1898 (Act V of 1898), and is required in order to make it clear that pending cases are to be governed by the new law. If this provision were not made, evils which the Bill is designed to remedy would, to some extent, continue.

4. *Clause 2 (2) (Bengal Act I of 1879, section 2)*.—We have inserted a definition of "bhagat bandhu mortgage," which is required for the purposes of section 10B, as now amended; and of the new section 152.

5. We have also inserted a clause to declare that "moveable property" includes standing crops. This is for the purpose of removing an existing uncertainty, and also to increase the facilities for realizing arrears of rent.

6. We have inserted a definition of "mundari khunt-kattidar" in clause 2 (2) of the Bill, and have made additions to the definitions of "tenure," "tenure-holder" and "raiyat" to show that mundari khunt-kattidars are neither "tenure-holders" nor "raiyats." We have also proposed various amendments

in clauses 7 to 10, 15, 21 (*2*), 22 to 25 (*a*), 28 and 42 of the Bill, with the object of adapting the Act to mundari khunt-kattidars, and have inserted some special provisions for this class of tenants in clause 41, which are explained in paragraph 36, *post*.

7. We have struck out the definition of "permanent tenure." The expression was used only in the section 36A which it was proposed by clause 13 of the Bill as introduced to insert in Bengal Act I of 1879; and, in the amalgamation of that section with the new section 34 contained in clause 16 of the Bill as now amended, it has not been found necessary to make use of the expression in question.

8. We have inserted a definition of "registered." It will be required for the purposes of the new sections 10A (*b*) and 152 (*1*), proviso.

9. We have struck out the definition of "rent" which was contained in clause 2 (*c*) of the Bill as introduced. The general consensus of local opinion is that no definition is needed, and we have not been able to devise any satisfactory definition. Hitherto the local Courts have not in any way been inconvenienced by the absence of a definition of rent. Since rent in these districts consists of cash, predial services and rakumats or payments in kind, it was considered impossible under any circumstances to accept the definition proposed in the Bill as originally presented. To have done so would have been in effect to mulct the landlords of a large portion of their rent, for which no reason was apparent.

10. We have inserted in the place of the original definition a mere declaration that the term "rent" includes money recoverable under any enactment for the time being in force as if it was rent. This declaration is taken from section 3 (*5*) of the Bengal Tenancy Act, 1885 (VIII of 1885), and is required in order to make clear the application of sections 12 to 17 (receipts for rent and deposit of rent) and 123 (sale of tenures and holdings for arrears of rent) of Bengal Act I of 1879 to road cess and public works cess, and in order to extend the new section 34 (referred to in paragraph 25, *post*) to those resumable tenures for which no "rent," in the ordinary meaning of the word, is paid.

11. In the definition of "resumable tenure" we have inserted words to show, in accordance with the intention with which such tenures are granted, that the resumption may be made by the successor in title of the original grantee.

We have also struck out the words "free of all incumbrances," because it is not clear that any avoidance of incumbrances has usually been stipulated for on the grant of tenures of this class. The stipulation in question is rather one imposed by the Legislature, and we have accordingly transferred the Explanation to the clause so as to form a separate section (numbered 36A). We have made some alterations in the new section 36A, which are explained in paragraph 27, *post*.

Further, we have added to sub-clause (*i*) words to show that the failure of heirs, on which resumption may take place, is a failure of heirs in the male line, this being the recognized custom; and we have substituted the words "definite contingency" for "certain expressed contingency," since the term "expressed" might be taken to mean in writing, and the conditions are not always in writing.

12. We have included in the definition of "tenure-holder" the holders of tenures registered under the Chota Nagpur Tenures Act, 1869, since they are regarded as tenures under that Act.

13. *Clause 3 (section 6)*,—We have added a clause to declare that every raiyat cultivating or holding land known as korkar, baiballa, khandwat, sajhwat, jalsasan or ariat (synonymous terms) shall have a right of occupancy in the land, so long as he pays the rent, irrespective of the period of his cultivation or holding. This clause merely confirms local custom, as recorded so long ago as the year 1875 by Mr. G. K. Webster, Manager of the Chota Nagpur Estate, and in 1876, by the then Commissioner of Chota Nagpur, for Hazaribagh.

14. By *clause 4* of the Bill as introduced it was proposed to add a proviso to section 9 of Bengal Act I of 1879 to declare that, if any patta granted to a

non-occupancy raiyat specifies a rate of rent in excess of that payable by such raiyats in accordance with local custom, the excess should not be payable. We have struck out the clause. Local officers are opposed to it, and we are not in possession of facts sufficient to lead us to provide for non-occupancy raiyats a protection which does not exist in other parts of Bengal.

15. *Clause 4 (section 10A).*—We have added a proviso to authorise the sale of a raiyat's holding for arrears of rent accruing in respect of the holding, and an Explanation to make it clear that a holding may not be sold for the recovery of arrears due to one or more only of several joint landlords. Landlords who have at heart the interest of their raiyats have represented that ejectment is too harsh a remedy and would result in depriving the raiyats of the value of the labour expended by them on their holdings.

We have also added an Explanation to make it clear that raiyats' holdings may be sold under the Public Demands Recovery Act, 1895 (Bengal Act I of 1895), for the recovery of loans granted under the Land Improvement Loans Act, 1883, or the Agriculturists' Loans Act, 1884.

We have adopted the provision in section 65 of the Bengal Tenancy Act, 1885, that when a holding is sold for arrears of rent the rent shall be a first charge thereon.

16. *Clause 4 (section 10B).*—In order to recognise the common practice of raiyats putting in trust or leasing their holdings on proceeding to Assam under the Assam Labour and Emigration Act, 1901 (VI of 1901), we have extended the term of permissible mortgages and leases from two to five years. The term of the labour contract under the Act mentioned is four years, and an additional year should be allowed for the journey to Assam and back and for incidental delays.

We have, further, provided that the maximum period for which a bhagat-bandha mortgage may be made shall be seven years, this being by local custom what is regarded as necessary to meet the financial needs of the cultivators.

We have also provided, on the analogy of section 88 of the Bengal Tenancy Act, 1885, that no transfer of a raiyat's rights shall be binding on the landlord unless it is made with his consent in writing.

Finally, we have added a sub-section to authorise the Deputy Commissioner to put a raiyat into possession of his holding on the expiration of the period for which he has transferred his rights in it.

17. *Clause 4 (sections 10A and 10B).*—We desire to record our opinion that it will, in all probability, be necessary at some future time to devise a procedure for the purpose of preventing the evasion of sections 10A and 10B. It is understood that similar prohibitions are safeguarded by official action in the Sonthal Parganas.

18. *Clause 5 (section 11).*—In order to obviate doubts which might arise in consequence of the abandonment of the definition of "rent," we have expressly declared the new section 11 to apply to the levy of any money in excess of the rent legally payable (with interest) or any rakumats or predial services to which the landlord is not legally entitled.

As it would be impossible for the Deputy Commissioner to deal with all applications made under the section, we have added words to enable the Local Government to empower other officers to adjudicate upon them.

We have adopted the suggestion of the British Indian Association that the maximum penalty should be Rs. 200, as in section 75 of the Bengal Tenancy Act, instead of Rs. 500.

19. *Clause 6 (section 12).*—We have altered sub-section (3) so as to make it follow more closely the earlier part of section 58 (2) of the Bengal Tenancy Act; and we have added a clause to authorise the Deputy Commissioner to award a portion of the fine to the tenant.

20. *Clause 7 (section 13).*—This clause is new. It adds clauses to section 13 of Bengal Act I of 1879, to declare definitely the cases in which rent may be deposited in the Court of the Deputy Commissioner. The absence of such a declaration has, in the past, caused much hardship to the tenantry and led to much perjury in applications, prepared by petition-writers, for the acceptance of deposits of rent.

21. *Clause 11 (section 28B).*—We have reduced from fifteen to seven years the period for which the rent of a tenure, an occupancy-holding or the holding of an under-raiyat having occupancy-rights is not to be enhanced, after entry of such rent in the record-of-rights. The main object of section 28B being to secure, with a minimum of friction, materials for future legislation, we think that seven years will be a sufficient period during which to bar the enhancement of such rents, as the contemplated legislation is likely to be accomplished within that period.

22. *Clause 12 (section 30).*—We have, in order to secure simplicity of calculation, substituted 6¼ for 6 *per cent.* as the rate of interest payable on arrears of rent. The new percentage works out at one anna in the rupee.

23. *Clause 13 (section 31).*—This clause is new. Since it is proposed [*see* paragraph 15, *ante*] to amend section 10A so as to allow the sale of holdings for arrears of rent, it is unnecessary to allow the ejectment for arrears of any but non-occupancy raiyats; and clause 13 of the amended Bill revises section 31 of Bengal Act I of 1879 accordingly, section 66 (*1*) of the Bengal Tenancy Act being taken as a model. When arrears accrue in respect of a non-occupancy holding, we think the landlord should have a right either to sell the holding or to eject the raiyat.

24. *Clause 14 (section 32A).*—This clause is new. It authorises the ejectment of any raiyat who, after the commencement of the new law, uses the land comprised in his holding in a manner which renders it unfit for the purposes of the tenancy. The clause is based on section 25 (*a*) of the Bengal Tenancy Act, and is required to meet cases, as, for instance, those which have been frequent in Ranchi town, of raiyats transferring their holdings for building purposes.

25. *Clause 16 (section 34).*—We have recast this clause, and propose to repeal section 34 of Bengal Act I of 1879 altogether, and to substitute for it a new section, containing the following amendments:—

(*1*) transfers of tenures or portions thereof, by sale, gift, mortgage or exchange, are required to be registered, as well as transfers by succession or inheritance;

(*2*) the transferee himself, or his successor in title, is required to apply for registration;

(*3*) provision has been made, on the analogy of section 12 (*2*) of the Bengal Tenancy Act, for the levy of a registration-fee by the landlord;

(*4*) the clauses as to the time when application for registration should be made have been struck out, it being provided instead that the transferee shall not be entitled to recover rent until he has applied for registration and paid the registration-fee;

(*5*) the clauses as to the Deputy Commissioner putting the landlord into possession of a tenure, on failure of the transferee to register a transfer, have been abandoned, since as a matter of practice such a procedure could not be worked by the Deputy Commissioner. It is considered preferable to debar the transferee from recovering rent until he applies for registration of a transfer and pays or tenders the requisite fee;

(*6*) it has been expressly declared that the section shall not validate unlawful transfers, and shall not affect the right of the landlord to resume a resumable tenure;

(*7*) it has also been expressly declared that the mere registration of a transfer shall not be deemed to imply the consent of the landlord to the transfer being made, and that the landlord shall not be bound by the terms or conditions of any transfer.

26. *Clause 19 (section 36A).*—As it is now proposed to abandon the present procedure for giving khas possession to a zamindar of a resumable tenure when the transferee fails to register his transfer, no distinction between resumable and permanent tenures in the matter of registration is needed, and so section

36A which appeared in clause 13 of the Bill as introduced has been struck out. Such of its provisions as it is necessary to retain have been embodied in the new section 34 introduced by clause 16 of the amended Bill.

27. The new section 36A, as to the annulment of incumbrances on the resumption of a resumable tenure, reproduces the Explanation to clause 2 (*f*) of the Bill as introduced, with the following substantive alterations:—

(*1*) in the opening clause of sub-section (*1*) the words "or permission" are added for greater security;

(*2*) we have struck out sub-clause (i) of the Explanation to clause 2 (*f*) of the Bill as introduced. It is contrary to the essence of a resumable tenure that the grantee should create an under-tenure, to be binding on the grantor of the tenure. Persons in whose favour such under-tenures are created are perfectly aware that the grantee of the tenure holds it subject to a right of resumption on the happening of some definite contingency, and that their rights must come to an end on the happening of such contingency. The sub-clause in question was taken from section 160 (*a*) of the Bengal Tenancy Act, 1885, and the considerations which make the sub-clause applicable in Bengal generally do not apply in Chota Nagpur. The abandonment of sub-clause (i) necessitates the abandonment of sub-clause (ii), and the latter has accordingly also been struck out;

(*3*) in order to prevent holders of resumable tenures from being misled into thinking they have a right to minerals, we have inserted the words "under lawful authority" after "or wherein a mine has been sunk," in clause (*a*), and have added a sub-section to declare expressly that this clause shall not be construed to confer on such holders any right over minerals which they do not otherwise possess;

(*4*) we have inserted clauses to protect from annulment any right to hold terraced lands known locally as "korkar" and by other synonymous names, also any right to hold land occupied by a sacred grove, and any mundari khunt-kattidari tenancy;

(*5*) sub-clause (v) of the Explanation to clause 3 (*f*) of the Bill as introduced saved from annulment any right conferred on an occupancy raiyat to hold at a rent which was a fair and reasonable rent at the time the right was conferred. We are not in possession of facts sufficient to show that the clause is necessary, and we have struck it out.

28. *Clause 29 (section 88).*—Since it is proposed (*see* paragraph 15, *ante*) to amend section 10A so as to allow the sale of holdings for arrears of rent, we have, by the present clause, declared section 88 to apply to non-occupancy raiyats only.

Following clause 26 of the Bill, we have extended from 15 to 30 days the period within which payment will operate to stay the execution of a decree under section 88. We have also added a clause, based on section 66 (*3*) of the Bengal Tenancy Act, authorising the Court, for special reasons, to extend this period of thirty days.

Lastly, we have, in order to embody the decision of the High Court in the case of Ram Narayan Singh *v.* Lala Roghunath Sahai, I. L. R., 22 Calc., 467, inserted the word "final" in section 88.

29. *Clause 30 (section 123).*—We have, at the suggestion of the Ranchi Bar, added words to make it clear that all the provisions of the Bengal Rent Recovery (Under-tenures) Act, 1865 (Ben. Act VIII of 1865), shall, as far as may be, apply to the sale of tenures, under Bengal Act I of 1879, for arrears of rent.

We have added words to make section 123 applicable to holdings. Since it is proposed (see paragraph 15, *ante*) to authorise the sale of raiyati holdings for arrears of rent, it is necessary to provide a procedure for effecting the sale, and the most convenient plan is to adopt the procedure for the sale of tenures.

We have added a proviso to empower the Commissioner to prohibit or stay the sale of any tenure or portion of a tenure. At present the sanction of the Commissioner to any such sale is needed. This we think needless to retain, but we would for administrative reasons give the Commissioner the power to prohibit or stay the sale of a tenure. The Commissioner has similar powers in respect of sales of tenures under the Code of Civil Procedure.

To bring the second proviso into harmony with clause *2 (k)* as now amended, we have inserted the words "or his successor in title" after "grantor."

30. *Clause 32 (section 125).*—We have added a proviso, taken from section 278 of the Code of Civil Procedure, to declare that a claim by a third party alleging that he is in possession of a tenure which it is proposed to put up for sale shall not be inquired into if the Court considers that the claim was designedly or unnecessarily delayed. Such claims are now a fruitful source of delay, to obviate which this proviso is required.

Additions have been made to the earlier parts of section 125, in consequence of the extension (*see* paragraph 29, *ante*) of section 123 to the sale of holdings.

31. *Clause 34 (section 130A).*—We have altered section 130A so as to make it follow section 310A of the Code of Civil Procedure (Act XIV of 1882), embodying an amendment appearing in the pending Bill for the amendment of the Code.

32. *Clause 37 (section 135).*—We have altered this clause so as to declare that orders passed after decree and relating to the execution thereof shall be appealable to the Court to which an appeal from the decree itself would lie. Unless this is done confusion may result.

33. *Clause 38 (sections 136 and 140).*—Following clause 26 of the Bill, we have extended from 15 to 30 days the period for an appeal to the Deputy Commissioner.

34. *Clause 39 (section 144).*—We have added a clause to section 144 to declare that a second appeal shall lie to the High Court from any appellate decree passed by the Judicial Commissioner under Bengal Act I of 1879. This clause will restore the law as it was interpreted prior to the decision in Khedu Mahto *v.* Budhun Mahto [1900], I. L. R., 27 Calc., 508. As so many amendments are proposed by the present Bill, we consider it desirable that an opportunity should be afforded for obtaining a decision of the High Court on points of construction that may arise in the future working of the Act.

35. *Clause 40 (section 144A).*—This clause is new. It introduces a section, at the suggestion of the Judicial Commissioner, authorising that officer to transfer appeals to his own Court from the Court of the Deputy Commissioner. The new section will tend to lessen the chance of different orders being passed by appellate Courts in analogous cases.

36. *Clause 41 (sections 151 to 164).*—We understand that it is very necessary to have measures taken that will check the agitation which has for long disturbed the people, locally known as Mundaris, who inhabit certain parts of the Chota Nagpur Division. One of the chief causes of this agitation is the treatment which hitherto has been accorded to the khunt-kattidars, or descendants of the original clearers of the soil. We have had the advantage of hearing and examining the officer to whom has been entrusted the work of preparing a record-of-rights of the tract where these Mundaris are chiefly congregated, and in our opinion the sections we have embodied in the Bill with regard to this question will have the desired effect, as far as it is practicable to secure it.

The restrictions on transfer are what those most conversant with the nature of the tenancy recognize as being necessary.

Since the sale of these tenancies is to be forbidden, it is necessary in the interests of the landlord to provide for some summary method by which, in case the rent falls into arrear, the moveables of the debtors can quickly be attached. For this reason, and also with a view to hasten the disposal of claims and to

lessen the costs, we have suggested, with regard to those tenancies for which a record-of-rights has been prepared, the employment for the realization of arrears of rent of the procedure of the Certificate Act, subject to certain restrictions.

We have also considered it essential to provide that the entries in the record-of-rights shall be final and conclusive, so that confidence may thereby be restored in the minds of these people.

37. *Clause 43 (Bengal Act IV of 1897, section 4)*.—We have altered the words "legally assessable" to "fair and reasonable." The latter words will, we consider, provide a better standard for fixing the rent payable after commutation of predial conditions or services.

38. *Clause 44 (Bengal Act IV of 1897, section 9A)*.—This clause is new. It embodies a new section, the object of which is to save much expense to landlords and tenants, by providing for the concurrent preparation of the records-of-rights and the record and commutation of predial conditions or services.

39. We recommend that the Bill be passed as now amended.

Addition to section 6.

3. To section 6 of the said Chota Nagpur Landlord and Tenant Procedure Act the following shall be added, namely:— Ben. Act I of 1879.

"Every raiyat who cultivates or holds land known as korkar, baiballa, khandwat, sajhwát, jalsasan or ariat shall have a right of occupancy in such land so long as he pays the rent payable on account of the same, notwithstanding that he has not cultivated or held the land for a period of twelve years."

4. After section 10 of the said Act the following shall be inserted, namely:—

Restrictions on sale of raiyats' rights.

"Provided as follows:—

(*a*) any holding may be sold, in execution of a decree of a competent Court, to recover an arrear of rent which has accrued in respect of the holding; and

(*b*) nothing in this section shall affect the terms or conditions of any contract registered before the first day of January, 1903.

"*Explanation I.*—Where a holding is held under joint landlords, and a decree has been passed for the share of the rent due to one or more, but not all, of them, proviso (*a*) does not authorise the sale of the holding in execution of such decree.

"*Explanation II.*—Proviso (*b*) does not render valid any document which is otherwise illegal or invalid, or authorise a Court to take judicial cognizance of any such document.

"*Explanation III.*—This sub-section does not prevent the sale of a holding for the recovery, under the Public Demands Recovery Act, 1895, of a loan granted for the benefit of the holding under the Land Improvement Loans Act, 1883, or the Agriculturists' Loans Act, 1884. Ben. I of 1895. XIX of 1883. XII of 1884.

"(*2*) When a holding is sold for an arrear of rent which has accrued in respect thereof, the rent shall be a first charge on the holding. [*Cf.* Act VIII 1885, s. 65.]

Restrictions on transfer of their rights by raiyats.

"10B. (*1*) No transfer by a raiyat of his right in his holding or any portion thereof, by mortgage or lease for any period exceeding five years, or by sale, gift or any other contract or agreement, shall be valid to any extent: [*Cf.* Act XI of 1898, ss. 46 (3), (5): 70 (3), (5).]

(Part II.—Amendment of the Chota Nagpur Landlord and Tenant Procedure Act.—Clauses 5—7.)

"(*4*) At any time after the expiration of the period for which a raiyat has, under this section, transferred his right in his holding or any portion thereof, the Deputy Commissioner may, in his discretion, on the application of the raiyat, put the raiyat into possession of such holding or portion."

Amendment of section 11. 5. For section 11 of the said Chota Nagpur Landlord and Tenant Procedure Act the following shall be substituted, namely:— Ben. Act I of 1879.

"11. (*1*) A landlord who, except under any special enactment for the time being in force, levies from a tenant any money in excess of the rent legally payable, with interest thereon, or any rakumats or predial services to which he is not legally entitled, shall, on the application of the tenant, be liable, [Cf. Act XI of 1898, s. 10.]

Penalty on landlord levying anything in excess of rent or lawful rakumats or services.

under the order of a Revenue-officer not below the rank of Deputy Commissioner, or under the order of any officer who may be specially empowered by the Local Government in this behalf,

to pay as penalty such sum as such officer thinks fit, not exceeding two hundred rupees, or, when double the amount or value of what is so levied exceeds two hundred rupees, not exceeding double that amount or value.

"(*2*) Such sum shall be awarded to the tenant as compensation."

Amendment of section 12. 6. For section 12 of the said Act the following shall be substituted, namely:—

"12. (*1*) Every tenant who makes a payment on account of rent to his landlord shall be entitled to obtain forthwith from the landlord or his agent a signed receipt for the same, in a form prescribed by the Local Government from time to time by notification in the Calcutta Gazette. [Cf. Act III of 1885, ss. 56 (*1*), (*2*), (*3*); 58.]

Receipts for rent.

"(*2*) The landlord or his agent shall prepare and retain a counterfoil of the receipt, in a form prescribed as aforesaid.

"(*3*) If any landlord or his agent, without reasonable cause, fails to grant such a receipt or to prepare and retain such a counterfoil, then, on proof thereof, the Deputy Commissioner may, in a summary proceeding, by order, impose on the landlord a fine which may extend to fifty rupees in respect of each such failure; and may, in his discretion, award to the tenant, by way of compensation, such portion of the fine as the Deputy Commissioner may think fit.

"(*4*) If, in any suit or other proceeding under this Act or any other law, the Court or presiding officer (not being the Deputy Commissioner) finds that any landlord or agent has failed—

(*a*) to deliver to a tenant a receipt in the prescribed form for rent paid by the tenant, or,

(*b*) to prepare and retain a counterfoil in the prescribed form of a receipt delivered to a tenant as aforesaid, such Court or officer shall inform the Deputy Commissioner."

Amendment of section 13. 7. (*1*) In section 13 of the said Act, for the words "or raiyat," wherever they occur, the words "raiyat or mundari khunt-kattidar" shall be substituted.

(*2*) In the same section, after the words "entertain a suit" the words "or application" shall be inserted.

The Chota Nagpur Tenancy (Amendment) Bill, 1903.

(Part II.—Amendment of the Chota Nagpur Landlord and Tenant Procedure Act.—Clauses 8—11.)

(3) To the same section the following shall be added, namely:—

"A deposit may be made under this section in either of the following cases, namely— [Cf. Act VIII of 1885, s. 61 (b), (c).]

(a) when an under-tenant, raiyat or mundari khunt-kattidar who is bound to pay money on account of rent has reason to believe, owing to a tender having been refused or a receipt withheld on a previous occasion, that the person to whom his rent is payable will not be willing to receive it and to grant him a receipt for it; or

(b) when the rent is payable to co-sharers jointly, and the tenant is unable to obtain the joint receipt of the co-sharers for the money, and no person has been empowered to receive the rent on their behalf."

Amendment of section 14.

The 7th July 1903.—The following is published for general information.

A. Earle,

There has been no change in the system of observations, the second-class observatories recording three sets of observations, viz., at 8 A.M., 10 A.M., and 4 P.M., and the third-class observatories recording observations at 8 A.M. only.

3. Automatic instruments recording pressure and temperature are in use at the following stations:—

Chittagong.	Puri.
Burdwan.	Cuttack.
Balasore.	

The last-named station commenced automatic registration from 23rd September 1902. The instruments were taken by my head clerk and put up under his personal supervision. A barograph and an anemograph are in use at Saugor Island.

RESULTS OF INSPECTION AND WORK AT OBSERVATORIES.

6. *2nd class observatories.*—Three out of the six second class observatories were inspected. *Darjeeling* was inspected by Sir John Eliot. The observations received from Darjeeling have been accurate throughout the year. *Darbhanga*, when inspected, was found to be in good condition, and the observations received from that station have been generally satisfactory. *Hazaribagh* at the time of inspection by my head clerk was found to be in a satisfactory condition. The work at Hazaribagh has been carefully done by Babu Nathu Lal, and the observations received during the past year, as in previous years, are trustworthy and accurate. Of the remaining three observatories which could not be inspected during the past year, *Saugor Island* and *False Point* continued to submit accurate observations, while the observations at *Chittagong* have not been so accurate.

7. *3rd class observatories.*—The 3rd class observatories generally were found to be in good condition. *Faridpur* requires special mention, for, according to the report of my head clerk, the observatory was in a most satisfactory condition at the time of his visit on 11th and 12th June, in charge of Babu Hara

Kanta Bose, 3rd teacher of the Local Zilla School who was appointed as observer by me when I visited the observatory on 26th January 1902. *Motihari* observatory, when visited by my head clerk, was found to be in a bad condition. The observer was unusually late in attendance, and the instruments seemed not to have been taken care of. The observations submitted by him previous to the date of inspection were not reliable, but since the inspection there have been fewer mistakes, and the returns, &c., have been received punctually. The instruments at *Barisal* were found by my second clerk at the time of his visit in good condition, but the observer was absent on the first day of inspection without making any arrangement for the record of observations at 8 A.M. on that date. The barometric observations prior to the visit of inspection, were doubtful. This was found to be due to wrong adjustment of the vernier by the observer. The observer was found to be careless in his work and was warned to be more careful in future. When I visited *Buxar*, I found that the observer was absent on leave. At the time of my head clerk's visit the observatory at *Rangpur* was not in a satisfactory condition. The work of observations was being carelessly done by a clerk of the Post-office, and the instruments seemed to have been neglected. The Postmaster who is the observer and is responsible for the condition of the observatory, was warned. *Pamban* was inspected by Mr. Gaetane. The observatory at *Purulia* was started in August 1899 and since then it had not been inspected. During the visit of inspection various defects of the instruments were remedied, and the observer received some necessary instructions. The observatory shed is situated in the Jail grounds in a well exposed site. The barometer is in the office room of the Superintendent of the Jail, the rain-gauge in close proximity to the shed, and the wind instruments are on the top of the jail gate wall. *Daltonganj* was, for the first time, inspected by me since the establishment of the observatory in April 1893. The following are extracts from my report of inspection :—

"The barometer is in a room in the Civil Hospital, in good light. The wind instruments, on the roof of the hospital, are freely exposed. The thermometer shed and rain-gauge are on a rising ground about half, or a third of, a mile from the hospital and 300 yards from the gate of the jail, which is the only building or obstruction of any kind in the neighbourhood. Exposure of all the instruments is good. The observer had never had any instruction except what he had picked up from the book of instructions, etc. His interpretation of the instructions was, as might have been expected, in some respects not what was intended. But he was willing and most anxious to do what would give satisfaction, and I think in several important respects there will be greater accuracy in the future. The readings of the barometer must be wrong for years past. The wind observations are not reliable. The thermometers and rain-gauge have been accurately observed I believe."

The mercury in the barometers at Daltonganj, Buxar, Purulia, and Ranchi was found to be exceedingly dirty, and was cleaned at the time of the inspection. The mercury of the barometers at Hazaribagh, Gaya, and Krishnagar was also cleaned.

Of the 3rd class observatories that could not be visited during the past year, accurate observations were received from *Berhampore*, *Jessore*, *Narayanganj*, and *Raniganj*, while the observers at the remaining stations have been more or less careless.

8. *Voluntary Observatory*:—The condition of the *Cooch Behar* Observatory at the time of the visit of my head clerk was very satisfactory, and the observations received have been accurate throughout the year.

9. Sir John Eliot, who visited Bogra, suggested the removal of the thermometer shed from its present position in the circuit-house compound to a site near the jail. The Public Works Department has been asked to effect the removal.

10. The question of removing the wind instruments of the Malda Observatory from the roof of the circuit-house (*vide* page 3 of my Administration Report for 1901-1902) was settled by me when I visited Malda. In consultation with Mr. B. De, Magistrate of Malda, it was arranged to fix the wind-vane and the anemometer on the roof of the cutchery building (the highest in the locality). The removal has since been effected.

11. During his visit to Puri my head clerk suggested the advisability of removing the wind instruments from the roof of the District Board's office, which is at some distance, to the roof of the newly-built Customs shed. The removal has since been effected.

12. The following observers were granted special awards by the Meteorological Reporter to the Government of India and Director-General of Indian Observatories for storm observations, etc., taken by them during the past year:—

Station.	Amount.	
	Rs.	A.
Burdwan	1	8
Jessore	1	0
Mymensingh ...	1	0
Saugor Island ...	9	8
Pamban	7	0

13. *Work at, and inspection of, Raingauge stations.*—The number of Raingauge stations on the 31st March 1903 was 374, *i.e*, eight more than on the corresponding date last year. Ten stations were started and two, viz., *Khiri* and *Chausa* were closed during the year.

14. The names of the stations started during the year are given in the following table:—

Station.	District.	Station.	District.
Khutona	Darbhanga.	Kodorma	Hazaribagh.
Ludania		Gumla	Ranchi.
Athmalik	Orissa Tributary Mahals.	Subarnakhali	Mymensingh.
Hindol		Tanor	Rajshahi.
Boad			Saran.

15. Generally speaking, the returns from the rain-registering stations were duly received, but there were a few stations as noted below, which sent the reports irregularly:—

Station.	District.	Station.	District.
Subarnakhali	Mymensingh.	Dharmsala	Cuttack.
Rajauli	Gaya.	Salipore	
Barkope	Sonthal Parganas.	Sadar	Muzaffarpur.
Bhagya		Agartala	Hill Tippera.
Nanihat		Ramchandrapur	Tippera.
Bhabua	Shahabad.	Dandkandi	
Sasaram		Kasba	
Mohania		Nasirnagar	

The co-operation of the District Officers has been requested with the view of obtaining prompt reports from these stations in future.

16. Four hundred and fifteen visits of inspection were made against 300 during 1901-1902 and 301 during 1900-1901. The total number of rain-gauges inspected was 232 against 177 in the previous year and 194 in the year 1900-1901. The reports received from the inspecting officers showed that the rain-guages were for the most part in good condition and the rainfall registers properly kept.

17. The following table shows the distribution of the 374 rainfall stations in the various districts in Bengal, as it stood on 31st March 1903, and the number of stations inspected in each district during the past year:—

District.	Number of rain-gauge stations.	Number of rain-gauge stations inspected.	District.	Number of rain-gauge stations.	Number of rain-gauge stations inspected.

18. The system of supplying rain-gauges and measure glasses to the rain-registering officers in Bengal from the Meteorological Office, Bengal, by an arrangement mentioned in paragraph 17 of my Adminstration Report for 1899-1900, worked satisfactorily.

19. *Departmental Reports.*—The short annual report on the meteorology of Bengal for the year 1902, with two maps illustrating the actual and percentage rainfall, was prepared before the close of the past official year. (It was submitted to the Government of Bengal on 4th April 1903.)

20. The report on the meteorology of Bengal for the monsoon season of 1902 was prepared and submitted to the Government of Bengal on the 26th January 1903. 29. There was no addition or alteration in the code of storm signals.

30. The dates of the principal storms and barometric depressions occurring during the past year are given in the first of the two following tables, and the action taken in the matter of issuing storm warnings and hoisting storm signals is indicated in the second of these tables:—

Table giving a brief statement of the storms which affected the Bay of Bengal Coast during the year 1902-1903.

Number of storm.	Period of depression or storm.	Character of storm.	Coast affected.
1	May 5th and 6th ...	Cyclonic storm which was close to Diamond Island on the morning of the 5th May—the centre probably about midway between that station and the Andaman Islands. Squally to stormy weather prevailed over the sea area to the south-west of Diamond Island. During the following 24 hours. the storm became more extensive and moved in a north-easterly direction. The chief feature of the disturbance was the strong cyclonic winds, not only while the depression was over the sea, but until it had moved some distance inland. By the 6th the disturbance had almost ceased.	Burma and Arakan Coasts.

Number of storm.	Period of depression or storm.	Character of storm.	Coast affected.
2	July 4th to 6th ...	This disturbance began as a diffused depression about the 4th July, extending over the south of the Bay, and causing, if the reports from Diamond Island be accepted, very strong winds in the east of the Bay. The depression formed further south than is usual in July, and moving in a north-westerly direction, crossed the coast of the Circars on the 6th.	Burma and Circars Coasts.
3	July 13th to 16th ...	Barometric depression which formed over the north of the Bay on the 13th July and was moving slowly northwards up to the 15th, but thereafter it moved north-westward. On the 16th, the centre was between Midnapore and Chaibassa. This depression never attained to more than moderate depth near the centre, but there was a very steep gradient over the whole Bay area, and with it exceptionally strong winds and rough sea.	Bengal and Orissa Coasts.
4	August 22nd to 24th ...	There was a well marked depression over the area represented by Rangoon and Moulmein on the 22nd August. It continued to move north-westward, the central area being south-east from Akyab on the 23rd and close to the Orissa Coast on the 24th. When the centre was in the north-west angle of the Bay, there was a steep pressure gradient with strongish winds over the whole sea area. On the 25th the depression was inland and over Chota Nagpur.	Ditt
5	August 31st and September 1st.	For several days, this disturbance was very slight and was shown as a wide diffused depression over the north of the Bay with light irregularly cyclonic winds at coast stations. On the 31st it was better defined, the central area was near the south coast of Orissa, and a steeper pressure gradient had developed over the south and centre of the Bay. The depression was still shallow, and the greatest defect was ·1 inch at False Point. On the 1st September the centre was still over the Bay, but it then moved rapidly westward.	Orissa Coast.
6	September 6th and 7th	This depression was only faintly outlined by the coast observations between the 3rd and 5th September and became well defined over the north-west angle of the Bay on the 6th, with a moderately steep gradient towards the south-east. From the north-west angle it moved slowly northwards into the central districts, and there it almost entirely filled up, with general heavy rain in Bengal Proper.	Ditto.
7	September 24th and 25th.	This was a slight disturbance while over the north-west angle of the Bay, but developed inland. No special warning was required, and the chief feature was the heavy rainfall inland.	Bengal Coast.
8	October 20th to 22nd ..	Shallow depression which formed in the east of the Bay and was of brief duration. It caused some increase of wind at Burma stations, and on breaking up, a slight disturbance entered the north of the Bay, but had little influence on the general weather conditions over the Province.	Orissa Coast.
9	October 28th to 30th...	Shallow depression which crossed the Madras Coast between Madras and Cuddalore from the south-east. The greatest deficiency in pressure was only ·3-inch, but the disturbance was remarkable, because of the exceptionally heavy rain which fell on the coast between Madras and Vizagapatam between the 28th and 30th September, and the strong winds between Masulipatam and Vizagapatam.	Circars and Coromandel Coasts.
10	November 16th to 18th	Towards the south of the Bay conditions were almost continuously unsettled, with strong winds and rough sea, but no definite cyclonic disturbance developed. As usually happens under such circumstances, rainfall was of almost daily occurrence on the Madras Coast, and at times heavy rain fell, notably between the 17th and 21st November.	Ditto.
11	December 15th ..	Slight depression which crossed the Madras Coast from the Bay, moving in a westerly direction.	Ditto.

31. The thanks of the Department are due to the tea and indigo planters, to the Moravian Missionaries at Pedong, and to the Chinese Commissioner of Customs at Yatung (in Tibet) who have kindly continued to send rainfall returns during the past year, to the Surveyor-General, Ceylon, for sending meteorological observations taken at Colombo and Trincomallee for the daily weather report, and to Messrs. Mackinnon Mackenzie & Company, Agents of the British India Steam Navigation Company, for allowing the commanders of their vessels to telegraph summaries of the weather experienced during their voyages.

32. *Office Establishment.*—The various members of my office establishment have given me full satisfaction as in former years. A considerable amount of extra work has been caused by the numerous applications for statistics in connection with the revision of the Imperial Gazetteer. In some cases the information required could not be supplied without a careful search of the records, in others averages had to be computed. In all cases, by working overtime, the information was supplied with the least possible delay.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JUNE 1903.

In the west of Bihar and Chota Nagpur almost rainless weather prevailed during the first two weeks of June; in other parts of the Province throughout the month, and in the above western districts during the latter half, showers were of daily occurrence, with two periods of almost general heavy rainfall, more especially in the east. The first period of heavy rain began about the 16th in the east, and continued for four or five days in Assam and Bengal Proper. The cause of the rainfall is not apparent, but there was probably a depression developing over Bengal as pressure fell, during those days, from being more than ·1 inch above to about ·16 inch below the normal, the latter in East Bengal on the 20th and 21st.

The low-pressure area was slowly displaced southward over the north of the Bay, where, as compared with the normal, there was a very slight depression on the 23rd, but a brisk rise was general in the depression area on the following day, and the distribution had become practically normal.

On the 25th a shallow depression formed in South-West Bengal with a regular cyclonic arrangement of light winds. This depression, without intensifying, moved first in a north-westerly direction into Chota Nagpur, then recurved, and passing over the west of Bihar on the 27th broke up on reaching the Himalayas. During its northerly advance moderate rain fell in the western districts. The rainfall became more heavy after the recurving commenced on the 26th, and thereafter for two days very heavy rain fell in North Bengal. The heaviest falls in 24 hours during those days in North Bengal were 11 inches at Bhagatpur and Fulbari. On the 27th and 28th the majority of the stations in Jalpaiguri, Darjeeling, and Cooch Bihar districts reported from 2 to 6 inches.

Except during those two periods of general rainfall, when well-marked monsoon conditions prevailed, the weather was remarkable for the numerous thunderstorms to which the showers were due. These local storms not only caused a fair amount of rainfall in Bengal Proper and some of the western districts, but also almost continuous low temperature. Maximum temperature on an average for the month was 1° to 3° below the normal in North Bengal, the adjacent part of East Bengal, and the greater part of Bihar, the lowest temperatures being at Motihari and Darbhanga. Minimum temperature was below the normal by about 1° except in Chota Nagpur. Mean temperature was low in Assam, North Bengal, and Bihar, about normal in Lower Bengal, and high in Orissa and Chota Nagpur—by 2° in the latter.

Unusually settled weather prevailed over the Bay. No cyclonic storm formed over the sea, but a local storm of an exceptional character developed on the 11th in the south of Orissa. It appears to have been a disturbance of the thunderstorm class, though more widely extended than these usually are, with high pressure in the centre. In the early morning strong northerly winds with rough sea developed at Gopalpur, and the disturbance moving rapidly southward squally weather was experienced in the north of the Circars on the forenoon of the 11th and in the south of the Circars in the afternoon. By the morning of the 12th weather was again settled on that part of the coast, but pressure was still high at Coconada and Masulipatam.

On the 16th and 17th some disturbance occurred on the Madras coast, but there was no low-pressure area or cyclonic winds, and the only change was a sudden widespread fall of temperature.

At the beginning of the month pressure was high and rising in Bengal, and the distribution was uniform for the season. Light winds prevailed over the Bay except in the north-west angle; and showers were fairly general at inland stations. The rise of pressure continued for several days, but there was little change in the general weather conditions except that temperature was as much as 6° below the normal in parts of North Bengal and Bihar on the 2nd and 3rd and again on the 6th.

Rainfall was less general during the second week, temperature rose, and was considerably above the normal, especially in the western districts. Considerable oscillations in pressure occurred with some defect at times, but by the middle of the month conditions had become very similar to what prevailed at the beginning. Then the first general disturbance began. At first there was only a slight fall of pressure in the east on the 16th, with general rainfall in Bengal Proper and a rapid fall of temperature in the northern districts. Pressure continued to fall on the 17th and 18th—rapidly on the latter date, and on the 19th the area of lowest pressure was in the west of Bihar. During these days rainfall continued heavy in Bengal Proper. It extended slowly westward, and was most general in the western districts on the 20th and 21st.

Pressure was still low on the 20th, but it began to rise on the 21st. This rise continued until the 24th, when there was a normal distribution except in the east of the Bay, where there was a small defect.

On the 25th a rapid fall of pressure occurred in South-West Bengal, and the second disturbance of the month began. The shallow depression moved towards Chota Nagpur on the 25th, and was in the west of Bihar on the 26th. The pressure gradient was throughout not more than moderate over the Bay, and the strong winds were confined to the north-west angle. On the 27th Saugor Island reported 29 and Gopalpur 30 miles an hour.

Heavy rainfall was reported from the extreme north of the Province on the 27th. The rapid rise of pressure which set in over the west of Bihar after the depression broke up caused a low-pressure area over the central districts with continued heavy rainfall in North Bengal. As the rising pressure advanced eastward, this low-pressure area disappeared, and by the 30th rainfall had, to a large extent, ceased.

Pressure was generally high during the early part of the month. Soon after the 15th, apparently in connection with the rainfall which about that date became general over Bengal, a brisk fall of pressure occurred, and for some days there was moderate defect.

The recovery, which was practically completed by the 24th, was immediately followed by the formation of a shallow depression over South-West Bengal. During the passage of this depression northwards over the western districts, pressure was again low in Bengal until the 27th, on which date a rapid rise began in Bihar and extended eastward over the Province. By the end of the month high pressure was again established over the whole area.

Owing to the high pressure during the first half of the month and the low pressure in the latter half, mean pressure for the whole month is normal or in slight excess. The greatest excess is ·03 inch in North Bengal and parts of East Bengal and Bihar.

Temperature was at times high in the western districts, and day readings were more frequently above than below the normal in Lower Bengal, Orissa, Chota Nagpur, and the west of Bihar. Mean maximum temperature for the month was, as already stated, above the normal by 1° or 2° except in North Bengal and the adjacent parts of Bihar and East Bengal. Mean minimum temperature was about 1° below the normal except in Chota Nagpur, where there was a small excess.

The mean variation from the normal in Chota Nagpur was an excess of 2°, in Orissa nearly 1°, and in South-West Bengal about half a degree. In North Bengal, Bihar, and Assam there was defect of between a half and one degree, and in East Bengal mean temperature was practically normal.

Rainfall was almost nil in the west of Bihar and Chota Nagpur during the first two weeks. With that exception showery weather was almost general throughout the month, and two periods of moderate to heavy rain in all parts of the Province occurred about the 16th and 25th. Rainfall was at times very heavy in the eastern districts, more especially in the extreme north-east, after the shallow depression filled up in Bihar on the 27th. Owing to the local character of the rainfall, except during those two periods, the total fall for the month was considerably below the normal in the western districts, while in the east of Bengal and in Assam there was a moderate excess.

North Bengal received 20·5 and East Bengal 19·7 inches—the former 2·8 and the latter 2·2 inches in excess. In South-West Bengal and Bihar defect was 1·6 inches, in Orissa 2·1 inches, and in Chota Nagpur 3·9 inches.

All the stations in Assam for which information has been received give excess amounts except Silchar, where there was a small defect. Sibsagar received more than double the normal, Shillong 9 inches excess, Dhubri 7 inches excess, and Gauhati 5 inches excess. At Cherapunjee the fall was 110 inches, the normal being 102.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 a.m. of that day.

o, overcast; t, thunder; p, passing temporary showers; K, strong wind.

3. The net tonnage of every vessel of class I, whether laden or empty, shall, for the purposes of these rules, be determined by the following measurements:—

A.—The product of half the length of the vessel from stem to stern, measured along the water-line, multiplied by the interior greatest breadth of the vessel, multiplied by the depth from the water-line to the bottom of the vessel, is to be taken as equal to the number of maunds upon which toll shall be levied.

C.—The maundage on which tollage shall be charged shall be a simple multiple of 12½ maunds, rejecting any remainder, by which the maundage, calculated as above, may exceed such simple multiple.

4. For vessels in class II the tonnage shall be determined as follows:—

The tonnage of steamers shall be the registered tonnage as given in the certificate of survey of the steamer.

Tolls shall be levied on the actual weight of cargo carried on steamers, flats, barges and other vessels included in this class, as declared in the manifests.

6. This ticket may be demanded and checked by any navigation officer while the vessel is within the limits of the bhil channel, and must be kept on board and at hand for that purpose.

7. All tolls are payable on demand and shall be paid at the toll station before a vessel is permitted to proceed. Provided that the Collector of Tolls appointed under section VIII of the Act may at his discretion permit vessels belonging to individuals or firms of recognized standing to proceed without pre-payment, on an undertaking that the bills for tollage due shall be liquidated monthly on presentation.
